Shanghai Daoryn Health Science&Technology Co.,Ltd

上海稻燃健康科技有限公司

Medical Devices 医疗器械 | Employees 员工：15

Doorun health focuses on providing digital medical solutions forcardiopulmonary rehabilitation.By building a complete standardized digital ecosystem for the diagnosis and treatment of cardiopulmonarychronic diseases,it achieves coverage of the entire medical process,all health scenarios,and the full life cycle of users.

上海稻燃健康科技有限公司是一家专注于呼吸健康领域的上海本土医疗器械研发与生产科技型企业，业务及研究重点主要涉及呼吸生理学、生物医学工程以及数据科学与人工智能在呼吸治疗康复中的应用。专注建立慢性病防、筛、诊、治、管的疾病医养护康生态，成为医疗健康领域提供数智化产品及体系方案的领先品牌，服务新型社会结构下的庞大慢病人群的健康需求。

PRODUCTS 产品 (2)

01 Oscillating positive expiratory pressure device 呼吸训练器

Oscillating positive expiratory pressure device Designed based on the principle of positiveexpiratory Vibration(OPEP),it can create positive expiratory pressure(PEP) during the user ' s exhalation,open up collapsed airways,and.maintain the stability of small airways.The ciliaresonate through the Oscillating vibration of the airflow,making the mucus easier to fall off and be discharged.

深呼吸训练器是一款基于震荡呼气正压原理的智能设备。它通过核心的物理机制，在用户呼气时产生高频振荡与背压，有效松动并移动气道深处的痰液，实现高效气道廓清；同时其可调节的阻力能主动锻炼呼吸肌群，提升肺功能与呼吸耐力。它将复杂的临床排痰与呼吸训练功能，整合于一个提供即时声音与触觉反馈、便携易用的设计中，为用户提供了一体化的非药物呼吸健康管理方案。

02 High-Flow Nasal Cannula Oxygen Therapy(HFNC) 高流量呼吸湿化治疗仪

Through intelligent temeprature and humidity monitoring and closed-loofeedback.mechanism,HFNC.provides patients with accurate high-flow oxygentherapy close to the human core body temperature(37°C) and 100%relativehumidity,making the mucuscilla cleaning function at its.best.The 2-8 L/min flow range effectively flushes pfysiological dead space,reduces CO2 rebreathing,and meets the needs of both infants and adults.

具备高低压氧源自适应功能，确保在不同供养环境下都能稳定输出精准高流速流量(2~8L/min)的湿化空氧混合气，即便脱离院内高压氧环境仍可以使用。设备整合了成人和儿童双模式，可以一键切换，为不同年龄与体型的患者提供最适宜、最安全的呼吸支持治疗方案。配合其独特的非对称鼻氧管设计，更贴合人体工学，在有效提升氧气输送效率的同时，极大增强了佩戴舒适度与密封性，减少漏气，确保治疗效果最大化。

Shanghai Chenghe Industrial Co., Ltd.

上海橙禾实业有限公司

Medical Devices 医疗器械 | Employees 员工：22

Shanghai Chenghe Industrial Co., Ltd., established in 2010 and headquartered at the G60 Science and Technology Innovation Cloud Corridor （Rafael Sky City） in Songjiang District, Shanghai, specializes in the medical device business. The company offers products covering Helicobacter pylori breath testing, colorectal cancer screening, red blood

上海橙禾实业有限公司2010年成立，坐落于上海松江G60科创云廊，主营医疗器械业务。 公司经营幽门螺旋杆菌呼气试验、大肠癌筛查、红细胞寿命测定、一氧化氮检测、呼末二氧化碳等产品，积累了稳固的渠道与客户资源。 企业恪守诚信经营、服务至上宗旨，实行规范化管理，依托产品品质与全流程优质服务，深耕医疗市场，收获业内与广大客户高度信赖。

cell lifespan measurement, nitric oxide testing, end-tidal carbon dioxide monitoring, and other offerings, having built solid and well-established channels and customer resources. Committed to the principles of integrity and service excellence, the company adheres to standardized management. Relying on product quality and full-process premium services, it has been deeply cultivating the medical market and has earned a high level of trust from both the industry and its extensive customer base.

01 Carbon Dioxide Sensor 呼末CO2检测模块

Product Highlights: Advanced dual-wavelength non-dispersive infrared (NDIR) technology is adopted to achieve high-precision and high-stability measurement of end-tidal carbon dioxide ($EtCO_2$), ensuring accurate and reliable test results. Different models provide multiple monitoring solutions to meet various clinical requirements.

采用先进的双波长非分散红外（NDIR）技术，实现呼末二氧化碳（$EtCO_2$）的高精度、高稳定性测量，确保检测结果准确可靠。不同的模型提供多种监测方案，满足不同临床需求。

EXPORT & DISTRIBUTORS 出口及经销

Export to Europe, UK, Italy, Germany, Spain. Export to Southeast Aisa: Vietnam, Malaysia, Indonesia, Thailand.

CERTIFICATIONS 认证

CE、MDR

02 Carbon Dioxide Monitor 二氧化碳监测仪

Product Highlights: Compact and portable design enables monitoring anytime and anywhere. Accurate measurement with real-time display. Real-time display of patient respiratory status and CO_2 changes, providing fast and reliable monitoring data for clinical use and helping healthcare professionals promptly detect ventilation abnormalities. Suitable for a wide range of clinical applications, including: Emergency Department (ED) Intensive Care Unit (ICU) Operating Room (OR) Patient transport and transfer services

1.小巧便携，随时监测；2.精准测量，实时显示。3.实时显示患者呼吸状态及CO_2变化，为临床提供快速、可靠的监护数据，帮助医护人员及时发现患者通气异常。4.适用于多种临床场景，广泛应用于： 急诊科（ED） 重症监护室（ICU） 手术室（OR） 病人转运等。

EXPORT & DISTRIBUTORS 出口及经销

Export to Europe, UK, Italy, Germany, Spain. Export to Southeast Aisa: Vietnam, Malaysia, Indonesia, Thailand.

CERTIFICATIONS 认证

CE、MDR

03 Multi-parameter Patient Monitor 多参数病人监护仪

Product Highlights: Multi-parameter synchronous monitoring. Integrates multiple vital sign monitoring functions, enabling real-time and continuous monitoring of patient vital signs and providing comprehensive and accurate clinical information. High-precision monitoring. Utilizes advanced digital signal processing technology and high-performance sensors to ensure accurate and stable data, meeting clinical monitoring requirements. Real-time waveform display. Supports real-time display of CO_2 waveforms and vital sign trends, helping healthcare professionals quickly assess patient respiratory and circulatory status. Intelligent alarm system with audible and visual alarms.

1.多参数同步监测。集多项生命体征监测于一体，可实时、连续监测患者生命体征，为临床提供全面、准确的监护信息。2.高精度监测。采用先进的数字信号处理技术和高性能传感器，确保监测数据准确、稳定，满足临床监护需求。3.实时波形显示。支持实时显示 CO_2 波形及生命体征趋势变化，帮助医护人员快速评估患者呼吸及循环状态。4.智能报警系统，支持声光报警

EXPORT & DISTRIBUTORS 出口及经销

Export to Europe, UK, Italy, Germany, Spain. Export to Southeast Aisa: Vietnam, Malaysia, Indonesia, Thailand.

CERTIFICATIONS 认证

CE、MDR

04 Nitric Oxide Analyzer 一氧化氮分析仪

Product Highlights: Rapid testing with results within 60 seconds, improving efficiency in outpatient and clinical diagnosis and treatment. Non-invasive, painless, and radiation-free, improving patient compliance and suitable for both adults and children. Accurate assessment of airway inflammation. Simple and user-friendly operation. Provides treatment efficacy monitoring.

1.快速检测，60秒出结果，提高门诊和临床诊疗效率。2.无创、无痛、无辐射，提高患者依从性，适用于成人及儿童。3.精准评估气道炎症。4.操作简单。4.提供治疗效果监测。

EXPORT & DISTRIBUTORS 出口及经销

05 Erythrocyte Life Span Tester 红细胞寿命测定呼气试验仪

Red blood cell (RBC) lifespan represents the earliest and most direct indicator of erythrocyte destruction. Under physiological conditions, the average lifespan of human red blood cells is approximately 120 days. In August 2019, the Chinese Medical Association released a clinical consensus recommending the exhaled carbon monoxide (CO) test as the preferred approach for assessing RBC lifespan in hematological disorders. According to this consensus, hemolysis as an etiological factor of anemia can be excluded if the RBC lifespan exceeds 70 days. An RBC lifespan ranging from 50 to 70 days is suggestive of hemolysis, whereas a lifespan shorter than 50 days confirms the presence of hemolysis. Furthermore, the severity of hemolysis correlates inversely with RBC lifespan. RBC lifespan is determined by quantifying exhaled carbon monoxide, a metabolic byproduct generated during erythrocyte breakdown. This measurement enables the calculation of the erythrocyte destruction rate, thereby allowing estimation of the patient's RBC lifespan. The detection device employed in this method is developed by Shenzhen Xianya Biotechnology Co., Ltd., and has been certified as a National Class II Innovative Medical Device. Compared with the ^{51}Cr labeling method utilizing well-type gamma counters, this technique improves detection efficiency by nearly 3,000-fold. It exhibits superior safety and rapidity, leading to a remarkable enhancement in overall workflow efficiency. Immediate testing is feasible, satisfying the clinical demand for rapid and accurate diagnosis, thus highlighting its substantial advantages. Measurement of RBC lifespan is pivotal in the diagnosis and differential diagnosis of hemolytic disorders. It serves as the foundation for precise classification of anemias and constitutes the gold standard for hemolysis diagnosis, permitting accurate quantification of hemolytic severity. Under specific clinical scenarios, it plays an indispensable role in confirming diagnoses, guiding therapeutic regimens, evaluating treatment efficacy and safety, and predicting disease progression. Consequently, this approach possesses profound clinical significance.

CERTIFICATIONS 认证

The CE certification process is in progress, the certificate has not yet been obtained.

红细胞寿命是反映红细胞破坏情况的最早、最直接的指标。在正常生理条件下，人类红细胞的平均寿命约为120天。2019年8月，中国医学会发布了临床共识，建议将呼出的一氧化碳浓度检测作为评估血液系统疾病中红细胞寿命的首选方法。 根据该共识，如果红细胞的寿命超过70天，则可以排除溶血作为贫血的病因。当红细胞寿命在50到70天之间时，提示可能存在溶血；而若寿命低于50天，则可确定存在溶血现象。此外，溶血的严重程度与红细胞寿命呈反比关系。红细胞寿命是通过测定呼出的一氧化碳浓度来确定的，一氧化碳是红细胞分解过程中产生的代谢产物。通过这一数值，就可以计算出红细胞的破坏速率，进而推断出患者的红细胞寿命。该方法所使用的检测设备由深圳市先亚生物科技有限公司研发，已被认定为国家二级创新医疗器械。与井型伽玛^{51}Cr标记法相比，这种技术的检测效率提升了近3000倍。它具有更高的安全性和更快的检测速度，从而显著提高了整体工作效率。能够实现即时检测，满足临床对快速准确诊断的需求，因此具有明显的优势。测定红细胞寿命对于溶血性疾病的诊断和鉴别诊断至关重要。它是精确分类贫血的基础，也是溶血诊断的金标准，有助于准确判断溶血的严重程度。在特定的临床情况下，它还能帮助确认诊断、指导治疗方案、评估治疗效果与安全性，以及预测疾病的发展趋势。因此，这种方法具有非常重要的临床意义。

06 Oxygen Mask 输氧面罩

By connecting the mouth to the right for nasal oxygen supply, it does not affect the examination operation of the mouth of the gastroscopy tube, making it convenient for doctors to perform intubation examination on the patient's throat. Effectively enhance oxygen supply and provide high wearing comfort.

通过向右连接口进行鼻部的供氧，不影响胃镜检查插管的口部的检查操作，方便医生对患者咽喉部进行插管检查。有效增强供氧量且佩戴舒适度高。

Shanghai Hongshi Weizi Healthcare Tech Co., Ltd.

上海红狮微子健康科技有限公司

Medical Devices 医疗器械 | Employees 员工：5

Shanghai Hongshi Weizi Healthcare Tech Co., Ltd. is a sales-oriented enterprise specializing in the health and wellness

上海红狮微子健康科技有限公司，2024年成立于上海，是一家专注于大健康领域的销售型企业，致力于打造全国领先的负氢离子

sector,established in Shanghai in 2024,dedicated to building China's leading hydrogen anion health technology brand. Guided by our core philosophy of "Hydrogen Power, Breathe New Life into Youth", we focus on the medical applications of hydrogen anions. Utilizing photon energy technology combined with premium materials and over 40 patented manufacturing processes, we deliver a series of innovative health products to the market. Through our integrated online-to-offline(020) marketing model, we are redefining wellness through technology and protecting lives with quality.Our mission is to enable more people to experience advanced health technologies, reawaken youthful vitality,and embark on a premium-quality healthy lifestyle.

健康类科技品牌。 公司以“负氢焕能，重启青春”为核心理念，聚焦负氢离子医学领域，以光子能量裂解黑科技，结合高端材料及40多项技术专利制造工艺，对系列产品进行销售。 公司通过线上线下融合的营销模式，以科技重塑健康，以品质守护生命，让更多人体验前沿健康科技，唤醒年轻活力，开启高品质健康生活！

LOOKING FOR AT THE FAIR 参展需求

Shanghai Hongshi Weizi Healthcare Tech Co., Ltd., founded in 2024 in Shanghai, focuses on hydrogen anion wellness devices with over 40 patented technologies. Participate in exhibitions to seek national exclusive agents (most in-demand cooperation model): Exclusive regional authorization; no supply to other dealers within the same territory. Tiered first-order policy, annual rebates and exclusive exhibition subsidies. Full operational support: product training, physiotherapy sales scripts, short video materials and offline event plans. After-sales service: local spare parts warehouse, remote video maintenance and a minimum one-year warranty for complete machines. Protection rules: strict price control and separated online & offline sales channels.

PARTNERSHIP MODEL 合作模式

We can sign exclusive national agency agreements for our full product line. For government and hospital bulk orders, we provide direct supply project cooperation without middlemen.

01 Sleep Booster HYDROGEN OXYGEN ION MACHINE 睡眠宝氢氧离子机

Sleep Booster HYDROGEN OXYGEN ION MACHINE · Shorten sleep onset latency, extend deep sleep duration & reduce sleep fragmentation · Rapidly elevate blood oxygen saturation level · Smooth respiratory tract, relieve nasal congestion & snoring · Actively Release Purification Factors To Reduce The Amount Of Bacteria And Viruses In The Air. Kill Virus ⩾99.9% Remove Bacteria And Mildew ›99.9% Clean Taste And Deodorization (Formaldehyde, Tvoc And Other Harmful Substances)

氢氧离子机 1.入睡时间短，深睡眠时间长，睡眠中断少 2.快速提升血氧饱和度 3.呼吸更顺畅，缓解鼻塞打鼾 4.主动释放净化因子，减少空气中细菌、病毒存量。 杀灭病毒⩾99.9% 除菌除霉⩾99.9% 净味除臭(甲醛、TVOC等有害物质)

02 SPA Hydrogen-Oxygen Ion Spa Machine SPA水疗机

SPA Hydrogen-Oxygen Ion Spa Machine 3 Modes Available – Let your skin fully absorb hydrogen-oxygen ion water Deep Penetration Stimulate epidermal regeneration, regulate metabolism for body shaping & skin rejuvenation Nourishment & Repair Nourish skin cells, brighten and soften skin, boost human immunity Acid-Base Balance Inhibit milia formation, balance skin pH to mild acidity

SPA水疗机 三种模式（美颜、美体、离子浴）让肌肤喝上氢氧离子水 1、层层深入 刺激人体上皮再生，调节代谢美体养颜 2、滋养修护 滋养细胞美白嫩肤，增强人体免疫力 3、平衡酸碱 抑制脂肪粒形成，调节PH至弱酸性

03 INTEGRATED HYDROGEN OXYGEN ION MACHINE 一体化氢氧离子机

INTEGRATED HYDROGEN OXYGEN ION MACHINE · Relieve Respiratory Discomfort Boost alveolar oxygen diffusion and balance respiratory microenvironment · Antioxidation & Anti-Inflammation Eliminate free radicals to reduce cellular oxidative damage · Optimize Immune Performance Activate immune cells to strengthen physical defense · Enhance Sleep Quality Soothe nerves to relieve anxiety, neurasthenia and insomnia

一体化氢氧离子机 1.缓解呼吸道疾病，还原离子提高肺泡内的氧分压，促进氧气从肺泡向血液中的弥散，同时也利于二氧化碳的排出，改善呼吸道局部微环境。 2. 清除自由基，减少氧化应激对细胞的损伤，缓解炎症反应。 3. 调节免疫提高免疫细胞的活性，有助于提升机体整体的免疫防御水平。 4. 改善睡眠质量改善自主神经系统的稳定性，调节大脑神经元的连接和神经递质的传递，对改善焦虑、神经衰弱、失眠等具有良好的效果。

Shanghai Upper Bio-tech Co., Ltd. is located in Zhangjiang Science City Modern Medical Device Park in Shanghai. Our company specializes in the development, production, sales, and big data services of internet-enabled intelligent point-of-care testing (iPOCT) products. Upper holds over 400 intellectual property rights and has participated in more than 20 national and provincial-level major projects. It has led the publication of three industry monographs, including POCT, iPOCT, and IVD +(Big Data Smart Diagnosis). Our company has received seven scientific and technological awards, 10+ honors such as National Key New Products and Shanghai High-Tech Achievement Transformation Projects, and contributed to five national, industrial, and group standards. Designated as a National Specialized and Sophisticated Small

公司简介 上海奥普生物医药股份有限公司地处上海张江科学城现代医疗器械园，是一家专注互联网+医学智慧即时检测(iPOCT)产品开发、生产、销售及大数据服务的高新技术企业。 公司创新数智高端医疗器械承担或参与国家、省部级等重大专项20余项，申请各类知识产权400余项，牵头编写并出版行业专著3部，获科学技术奖7项，国家重点新产品、上海市重点新产品、高新技术成果转化项目等10余项，参与建立国家、行业和团体标准等5项，是国家级专精特新“小巨人”企业、国家知识产权示范企业，并建有企业博士后科研工作站、上海即时检测医学工程技术研究中心、上海市企业技术中心等。 定位于心脑血管疾病、糖尿病肾病、自身免疫系统、优生优育、传染病以及炎症感染疾病等快速定量检测领域，公司先后推出60余个仪器和试剂品种，在全国及海外逾千家医疗机构得到应用，每年服务患者数千万人次。 公司在国内陆续出版了《即时检验》、《智慧即时检测&iPOCT》 及《IVD+ 大

Giant Enterprise, a National Intellectual Property Demonstration Enterprise, and home to a Postdoctoral Research Workstation, Shanghai Engineering Technology Research Center for Point-of-Care Testing, and Shanghai Enterprise Technology Center, Upper is a leader in innovation. Focused on rapid quantitative testing for cardiovascular diseases, diabetes nephropathy, autoimmune disorders, reproductive health, infectious diseases, and inflammatory infections, Our company has launched over 60 instrument and reagent products. These are used in over 1,000 medical institutions nationwide and internationally, serving tens of millions of patients annually. Through publications and industry initiatives, Our company introduced the "iPOCT" concept centered on precision, automation, cloud-based services, and sharing, along with a "smart diagnosis + health big data" model. It also pioneered the "3D Innovation(Instrument + Reagent + AI)" strategy integrating instruments, reagents, and cloud quality control. Listed on the National Equities Exchange and Quotations (NEEQ) under the code 873758 and entering the Innovation Tier, Upper leverages Shanghai Free Trade Zone policies and Zhangjiang's biopharmaceutical ecosystem. The company aims to accelerate synergies between capital, technology, and markets, establishing itself as a premier brand in China's digital diagnostic sector while contributing to Shanghai's and China's strategic goals.

数据智慧诊断》叁本行业学术专著，提出了以“精准化、自动化、云端化、共享化”为核心的“iPOCT”理念以及“智慧诊断+健康大数据”的模式；并推动了POCT国家标准的出台。在对未来发展趋势的精准预测下，公司率先提出了仪器、试剂、云质控为一体的“3D创新”理念并付诸实施。 目前公司已在新三板挂牌并进入创新层（证券简称：奥普生物，证券代码：873758），依托上海自贸区的政策开放与制度创新，借助全球科创中心张江生物医药产业的聚集优势，未来，公司将会进一步加强自主创新，加快“资本+技术+市场” 的高度融合发展，打造成为中国医学数智诊断企业一流品牌，为服务上海战略与国家战略作出贡献。

Specification 规格： ExoFaster-500

The ExoFaster is a fully automated exosome extraction platform based on size-exclusion chromatography (SEC). It is designed for the automated isolation and purification of small extracellular vesicles (sEVs) from cell culture supernatant, plasma, and other biological samples. The system flexibly processes 1–9 samples and completes nine samples in only 48 minutes, reducing manual operation while improving workflow standardization, reproducibility, and laboratory efficiency. The platform provides standardized extraction protocols, customizable programs, and automated cleaning procedures to support different research applications. Together with dedicated SEC columns, it delivers high-purity sEVs with well-preserved morphology and a predominant particle-size distribution of 40–150 nm, suitable for downstream analysis such as NTA, TEM, Western blotting, and other extracellular vesicle research.

基于尺寸排阻色谱（SEC）技术的全自动外泌体提取平台，主要用于从细胞培养上清、血浆及其他生物样本中自动分离和纯化小细胞外囊泡（sEVs）。仪器支持1–9个样本灵活处理，9个样本仅需48分钟，可显著减少人工操作，提高提取过程的标准化程度、重复性和实验效率。 平台配备标准提取程序、自定义程序和自动清洗程序，可满足不同科研场景的实验需求。配套专用层析柱能够获得粒径主要分布在40–150 nm、形态完整且纯度较高的sEVs，适用于后续NTA、TEM、Western Blot及其他外泌体研究。

02 Armada-500 Compact Fully Automated Integrated Biochemistry & Immunoassay Analyzer Armada-500 生免一体机

Specification 规格： Armada-500

The Armada-500 is a compact, fully automated integrated biochemistry and immunoassay analyzer enhanced with AI-powered intelligent algorithms, delivering up to 100 tests per hour. It supports multiple sample types and features intelligent liquid-level detection, automatic dilution determination, and alerts for sample probe blockage and abnormal air aspiration. These functions help reduce manual intervention and improve testing efficiency and operational reliability.

Armada-500是一款融合AI智能算法的紧凑型全自动生化免疫一体机，将生化检测与免疫比浊检测整合于同一平台。仪器最高检测速度可达100测试/小时，配置25个冷藏试剂位、30个37°C孵育位，可同时处理10个样本。最小加样量仅2 μL，兼容全血、血清、血浆和尿液等多种样本类型。 仪器通过AI辅助的智能液体管理与异常监测功能，支持液位检测、自动稀释判断，以及吸样针堵塞和吸入空气异常报警，帮助减少人工干预和操作风险，提高检测流程的自动化程度与运行可靠性。其紧凑型设计适用于门急诊、基层医疗机构及中小型实验室。

Medical Devices 医疗器械 | Employees 员工：8

Shanghai Miaoyu Biotechnology Co., Ltd. is located in Pudong and was established in 2021. Specializing in the field of medical devices and biotechnology, the company legally operates testing and analytical equipment, medical diagnostic and therapeutic instruments, as well as supporting technical consulting and equipment maintenance services. It has long been engaged in procurement projects for public medical institutions, adhering to standardized operation. With a professional service team, it provides

上海妙宇生物科技有限公司坐落浦东，2021 年注册成立，专注医疗器械生物科技领域，合规经营检验分析设备、医用诊疗器械，配套技术咨询、设备维保等业务。公司长期对接公立医疗机构采购项目，坚持规范经营，依托专业服务团队，为医疗单位提供高适配、一站式设备供应与售后解决方案。

medical institutions with highly adaptable one-stop equipment supply and after-sales solutions.

LOOKING FOR AT THE FAIR 参展需求

We aim to expand cooperation in medical services and technologies, such as telemedicine, traditional Chinese medicine, joint diagnosis and treatment, and technology licensing. We will showcase our innovative products and advanced technologies, increase our brand exposure through this international exhibition and local media, and raise our brand awareness across Southeast Asia. We also want to keep up with the latest trends in the regional medical market, join industry exchanges, build high-level connections, and establish long-term partnerships with executives, experts, and leading associations in the global healthcare industry.

01 Portable Multifunctional Analyzer 便携式多功能分析仪

Specification 规格： DP-H51

DP-H51 Series English Translation (Professional & Concise Version) DP-H51 Series: AI-enabled, all-in-one portable, ultra-fast and precise flagship POCT analyzer； Upgraded from DP-H50 with higher speed, lower consumption, smarter performance and better stability; suitable for various scenarios. Key Technologies & Advantages (Upgraded Highlights) 1.Ultra-fast detection: Complete blood count (CBC) in 3–5 minutes; combined testing of multiple items in ⩽ 10 minutes, approximately 30% faster than DP-H50. 2.Microsample testing: Peripheral blood ⩽ 25 μL, ideal for children, the elderly and patients with difficult blood collection. 3.AI empowerment: Equipped with POCT AI-LAB 2.0 for AI-assisted report interpretation, abnormal alert and quality control management. 4.Cloud connectivity: Compatible with Dihui Cloud, supporting remote quality control, data upload, LIS/HIS connection and regional laboratory sharing. 5.Single-use reagents: Room-temperature storage, ready to use, maintenance-free and no cross-contamination. 6.7-channel parallel testing: Supports simultaneous testing of 2 CBC samples + 5 immunoassay/biochemistry items, doubling efficiency. 7.Whole blood direct testing: One-step loading, automatic processing, no centrifugation or pre-treatment required. 8.Portable & durable: Integrated body, built-in battery and anti-vibration design, suitable for vehicle-mounted, outdoor and mobile medical applications.

DP-H51 系列可AI 智检、全能便携、极速精准的 POCT 旗舰，在 DP-H50 基础上，更快、更省、更智能、更稳定；适用各种场景；关键技术与优势（升级亮点）： 1、极速检测：血常规3–5 分钟，多项目联检 **≤10 分钟 **，比 H50 提速约 30%； 2、微量样本：末梢血 **≤25μL**，适合儿童、老人、采血困难人群； 3、AI 赋能：搭载POCT AI-LAB 2.0，AI 辅助报告解读、异常预警、质控管理； 4、云检互联：支持帝惠云，远程质控、数据上传、LIS/HIS 对接、区域检验共享； 5、单人份试剂：常温存储、即开即用、免清洗、无交叉污染； 6、7 通道并行：支持2 份血常规 + 5 项免疫 / 生化同时检测，效率翻倍； 7、全血直测：1 步上机，自动处理，免离心、免预处理； 8、便携耐用：一体化机身、内置电池、抗震动，适合车载 / 户外 / 移动医疗。

PRODUCTS 产品 (10)

01 Primary Antibody Reagent ER 雌激素受体抗体试剂（免疫组织化学法）

Specification 规格： 2ml

Rabbit anti-human ready-to-use primary antibody, used for breast cancer molecular subtyping and endocrine therapy guidance. Nuclear staining in ⩾1% of tumor cells predicts response to tamoxifen and other endocrine therapies.

兔抗人即用型一抗，用于乳腺癌分子分型与内分泌治疗指导。≥1%肿瘤细胞核阳性染色，预测他莫昔芬等内分泌治疗反应。

02 Primary Antibody Reagent PR 孕激素受体检测试剂盒（免疫组织化学法）

Specification 规格： 2ml

Rabbit anti-human ready-to-use primary antibody, used for breast cancer molecular subtyping and prognosis assessment. Positive expression correlates with endocrine therapy sensitivity, and together with ER testing, guides clinical medication decisions.

兔抗人即用型一抗，用于乳腺癌分子分型与预后评估。阳性表达与内分泌治疗敏感性相关，联合ER检测指导临床用药。

03 Primary Antibody Reagent HER2 HER-2抗体试剂（免疫组织化学法）

Specification 规格： 2ml

Mouse anti-human ready-to-use primary antibody, used for HER2 expression detection in breast cancer and assessment of eligibility for targeted therapy (e.g., trastuzumab). Positive results indicate higher invasiveness and require FISH confirmation.

鼠抗人即用型一抗，用于乳腺癌HER2表达检测与靶向治疗（曲妥珠单抗等）适应证评估。阳性提示侵袭性较高，需联合FISH法验证。

04 Primary Antibody Reagent TRPS1 转录抑制因子GATA结合基因1(TRPS1) 抗体试剂（免疫组织化学法）

Specification 规格： 2ml

Rabbit anti-human ready-to-use primary antibody, used for the diagnosis and differential diagnosis of breast cancer and various solid tumors. TRPS1 (GATA-binding protein 1) is highly and specifically expressed in breast cancer, aiding in pathological molecular subtyping.

兔抗人即用型一抗，用于乳腺癌及多种实体肿瘤的诊断与鉴别诊断。TRPS1（GATA结合蛋白1）在乳腺癌中特异性高表达，辅助病理分子分型。

05 Primary Antibody Reagent Claudin 18.2 细胞紧密连接蛋白 18.2 抗体试剂（免疫组织化学法）

Specification 规格： 2ml

Rabbit anti-human ready-to-use primary antibody, used for the differential diagnosis of gastric-type adenocarcinoma and cervical adenocarcinoma, with high sensitivity and specificity, and potential for targeted therapy.

兔抗人即用型一抗，用于胃癌型腺癌与宫颈腺癌鉴别诊断，敏感性与特异性高，兼具靶向治疗潜力。

06 Secondary Antibody Detection Kit 二抗试剂

Specification 规格： 300人份

Used for immunohistochemical staining, compatible with the fully automated immunohistochemical stainer (GAS series), to detect the target signal after primary antibody binding. HRP-labeled, DAB chromogenic, suitable for pathological diagnosis including breast cancer molecular subtyping.

二抗检测试剂盒用于免疫组化染色，与全自动免疫组化染色仪（GAS系列）配套使用，检测一抗结合后的靶标信号。HRP标记，DAB显色，适用于乳腺癌分子分型等病理诊断。

07 ully Automated IHC Stainer 全自动免疫组化染色机模型

Specification 规格： GAS96

High-throughput independent temperature control platform, capable of processing up to 30 slides per run. Supports multi-step staining protocols with automated operation and consistent results, suitable for batch immunohistochemical testing in pathology departments.

高通量独立温控平台，单次可处理30张切片。支持多步骤染色流程，自动化操作，结果稳定，适用于病理科免疫组化批量检测。

08 ully Automated IHC Stainer 全自动免疫组化染色机

Specification 规格： GAS96S-600

High-throughput independent temperature control platform, capable of processing up to 60 slides per run. Supports multi-step staining protocols with automated operation and consistent results, suitable for batch immunohistochemical testing in pathology departments.

高通量独立温控平台，单次可处理60张切片。支持多步骤染色流程，自动化操作，结果稳定，适用于病理科免疫组化批量检测。

09 Human MGMT Gene Methylation Detection Kit (Fluorescent PCR Method) 人类MGMT甲基化检测试剂盒

Specification 规格： 24人份

Utilizing fluorescence PCR method for qualitative detection of MGMT gene promoter methylation status in paraffin-embedded samples from patients with glioma, assisting in clinical medication guidance and prognosis assessment.

采用荧光PCR法，定性检测脑胶质瘤患者石蜡样本中MGMT基因启动子甲基化状态，辅助临床用药指导与预后评估。

10 EBER Probe Detection Kit EB病毒检测试剂盒

Specification 规格： 50人份

Utilizing digoxigenin-labeled probes for in situ hybridization detection of Epstein-Barr virus-encoded small RNA (EBER) in paraffin sections, with high sensitivity and widely used in pathological diagnosis of EBV-associated tumors.

采用地高辛标记探针，用于石蜡切片中EB病毒编码小RNA（EBER）的原位杂交检测，灵敏度高，广泛应用于EBV相关肿瘤病理诊断。

Shanghai Harmonia Aesthetics Medical Device Co., LTD

PRODUCTS 产品 (1)

01 Skin Injector 皮下电子注射器控制助推装置

Specification 规格： Skin 2 Skin Med-I；Skin 2 Skin Med-III

This product is an active medical device developed for cosmetic injection: a subcutaneous electronic syringe control and propulsion unit (hereinafter referred to as skin injector). The device itself does not come into direct contact with the human body or pharmaceuticals. Equipped with a negative pressure function, it fixes the skin via negative pressure suction before delivering a fixed dose of medication to the target injection site, serving as an auxiliary injection device. Its injection propulsion principle is as follows: Operated manually by medical staff, the main control unit of the embedded control software outputs control signals. The motor drive circuit drives the motor to rotate, and the rotation is transmitted to the lead screw through the reduction mechanism, converting rotational motion into linear motion of the nut. Connected to the plunger rod of the matched syringe, the nut pushes the piston to complete injection and infusion. The propulsion speed of the syringe can be adjusted by setting the motor rotation speed, so as to regulate the medication injection rate. Parameters including configured dosage, injection speed, negative pressure level and retraction distance of the propulsion unit can be set via the touch screen input system. During the entire injection process, the sensor system conducts real-time monitoring on the operating status of the micro-injection propulsion system and vacuum negative pressure system. An alarm will be triggered once abnormal operating conditions are detected.

本产品是为注射美容开发研制的一种皮下电子注射器控制助推装置（简称助推装置），属于有源医疗器械，产品本身不与人体或药物直接接触。其具备负压功能，通过负压装置将皮肤吸附定位后，再对需注射部位进行定量给药，是一款辅助推注器械。其注射推进功能的工作原理是：由医务人员手动操作控制，嵌入式控制软件的主控单元发出控制信号，电机驱动电路控制电机旋转，电机的旋转经减速机构驱动丝杆，将旋转运动转化为螺母的直线运动，螺母与配套注射器的推杆相连，从而推动活塞进行注射输液；同时，通过设定电机的旋转速度即可调整注射器的推进速度，进而调节所给药物的注推速度。助推装置的配置剂量、注进速度、负压强度、后退间距等参数可通过触摸屏输入系统进行设置。在整个注射过程中，系统会通过传感系统对注射微推进系统和真空负压系统的运行状态进行实时检测，并在出现非正常工作状态时发出报警提示。

01 E-WHEELCHAIR 轮椅

Specification 规格： ROVEE R1ULTRA

MOVEABLE ERGONOMIC WHEELCHAIR COMFORT With ergonomic insight, ROVEE R1 features an S-curve profile provides head-to-toe support for lasting comfort. Multi-directional support and synchronized Seat-Back Mechanism from 98°to 128°Gravity self-balancing, enhancing safety. PREMIUM MATERIAL SELECTION ROVEE R1 uses premium materials that balance softness, support, breathability, and style. A breathable woven mesh backrest combined with highresilience foam cushioning provides both comfort and reliable support, ensuring airflow and all-day seating comfort with multiple color options. AUTOMOTIVE-GRADE SUSPENSION ARCHITECTURE Designed by an automotive engineering team, ROVEE R1 features a one-piece die-cast magnesium alloy frame and a low-center-of-gravity chassis at all four corners, combined with dual front/rear shock absorbers. This robust suspension absorbs road vibrations, providing a smooth, stable ride while protecting spinal health. INTELLIGENT TECHNOLOGY, PRE- EMPTIVERISK DETECTION Rovee R1 combines an electromagnetic braking system with intelligent algorithms for responsive start-stop control, stable hill stops, and automatic speed adjustment, reducing rollback and tipover risks. Smart safety locks and anti-theft features prevent accidental operation and unauthorized movement. Additional protections include quick-release straps, anti-tip wheels, puncture-resistant tires, and a 3-in-1 lighting system with reflective strips for all-round safety. PRECISE CONTROLEFFORTLESS DRIVING 360°precise control with 7-level smooth speed adjustment enables low-radius turning — perfect even in tight spaces like elevators. Powered by dual 220W brushless motors: high efficiency, long lifespan, maintenance-free, energy-saving, eco-friendly, and extremely quiet. Advanced FOC technology delivers fast response, smooth and linear acceleration, for a refined and effortless ride. LG BRAND BATTERY CELLS SAFE & STABLE & RELIABLE High-efficiency LG lithium cells ensure safe operation, delivering up to 40 km range. Battery cell certifications include: CB, UN38.3, Air/Sea/Road Transport Certification, SDS Report, UL1642, UL2580, and multiple other certifications on battery safety and reliability. FLEXIBLE TO GO WITH YOU. FREEDOM TO MOVE YOUR WAY ROVEE R1 is the first electric wheelchair to combine quick-release and folding functions. It separates into three parts—the seat, chassis, and battery—with the seat usable independently. When folded, it becomes compact enough for car trunks, planes, and train compartments, ideal for travel and daily use. PREMIUM ADD-ONS ONE-CLICK UPGRADE FOR ENHANCED EXPERIENCE. ARMREST BAG Magnetic side bag follows the armrest contour, easy to install, stable, and keeps essentials within reach. BACKPACK Curved backrest storage fits seamlessly, increasing capacity without affecting design. SMARTPHONE HOLDER Flexible smartphone holder on the armrest, compatible with all smartphones, easy to adjust and secure.

人体可调节工学设计，乘坐舒适 依托人体工学研发理念，ROVEE R1采用S型曲线造型，从头到脚全方位承托，持久乘坐依旧舒适。座椅-靠背同步机构可在98°-128°之间多向调节，配合重力自平衡技术，进一步提升使用安全性。 甄选优质材质 ROVEE R1精选高端面料，兼顾柔软度、支撑性、透气性与外观质感。透气编织网布靠背搭配高回弹泡沫坐垫，兼顾舒适感与稳固支撑，空气流通性佳，可实现全天舒适就坐，同时提供多种配色可选。 汽车级悬架架构 由汽车工程团队设计打造，ROVEE R1搭载一体压铸镁合金车架，整车四角采用低重心底盘，搭配前后双减震器。这套高性能悬架可过滤路面颠簸，行驶平顺稳定，同时呵护使用者脊椎健康。 智能科技，前置风险预警 ROVEE R1搭载电磁刹车系统与智能算法，启停反应灵敏，坡道驻车稳固，可自动调节速度，降低溜坡与侧翻风险。智能安全锁与防盗功能，避免误操作以及非授权移动。多重安全防护：快拆绑带、防倾轮、防扎轮胎，以及带反光条的三合一照明系统，实现全方位安全保障。 操控精准，驾驶轻松省力 360°精准操控，7档顺滑调速，可实现小半径转弯，电梯等狭小空间也能从容通行。搭载双220W无刷电机：效率高、寿命长、免维护、节能环保，运行噪音极低。先进FOC磁场定向控制技术，响应迅速，加速线性平顺，驾乘体验精致轻松。 LG品牌电芯，安全稳定可靠 采用高性能LG锂电芯，运行安全，续航最高可达40公里。电芯拥有多项安全认证：CB、UN38.3、空/海/陆运输认证、SDS报告、UL1642、UL2580，以及多项电池安全可靠性相关认证。 便携随行，自在出行 ROVEE R1是首款同时具备快拆与折叠功能的电动轮椅。整机可拆分为座椅、底盘、电池三大部件，座椅可单独使用。折叠后体积小巧，可放入汽车后备箱，也可带上飞机、火车，适用于旅行与日常使用。 高端选配配件，一键升级体验 扶手收纳包，磁吸式侧包贴合扶手轮廓，安装简便、固定牢靠，随身物品随手可取。后背收纳包，弧形靠背背包贴合车身造型，扩容储物空间，不破坏整机外观设计。手机支架，扶手处柔性手机支架，适配各类手机，调节方便，夹持稳固。

Shanghai Caige Intelligent Technology Co., Ltd.

上海彩鸽智能科技有限公司

Medical Devices 医疗器械 | Employees 员工：7

Shanghai Caige Intelligent Technology Co., Ltd. is a technology-driven company specializing in market development and commercialization services in high-tech industries. With extensive experience in the healthcare and intelligent technology sectors, our team combines strong industry expertise, market resources and practical experience in international business development. We provide professional market development and commercialization support for advanced medical devices, with particular expertise in ophthalmic laser technology. We work with innovative medical device companies to support their market entry, clinical adoption and commercial development, helping bring innovative technologies to healthcare professionals and patients.

上海彩鸽智能科技有限公司是一家专注于高科技领域市场拓展与商业化服务的科技型企业。核心团队深耕医疗健康与智能科技产业，具备丰富的行业资源与市场运营经验。公司致力于为高端医疗设备提供专业的市场拓展及商业化落地服务，尤其在眼科激光设备领域拥有深度合作经验，助力国产创新医疗器械的临床应用推广。彩鸽智能秉持“专业、高效、创新”的服务理念，持续为客户创造价值。

LOOKING FOR AT THE FAIR 参展需求

1.Present the technical features of China Vision's femtosecond laser system — covering SMILE, FS-LASIK, keratoplasty, and presbyopia procedures — and convey the innovative image of a high-end Chinese ophthalmic device to the Southeast Asian ophthalmic community. 2. Utilize the exhibition platform to gain a preliminary understanding of the competitive landscape, product demand, and purchasing patterns in Indonesia's and Malaysia's ophthalmic equipment markets, while initiating basic contacts with local potential partners and collecting market feedback. 3.Through foundational exchanges with local industry associations and regulatory representatives, learn the general registration requirements and procedures in both countries, providing a reference for future planning. 4.Leverage the media exposure and showcasing opportunities of “Sail of Shanghai” to raise initial brand awareness for China Vision among Southeast Asian eye care professionals, laying a basic foundation for subsequent market activities.

01 Femtosecond Laser Surgical System for Ophthalmology 眼科飞秒激光治疗机

Specification 规格： FineVisu 2000

1.FAST:Ultra-Fast Scanning Technology:Surgery Speed Redefining Refractive With proprietary high-frequency laser scanning algorithms,FineVisu 2000* delivers cornealflap scanning in ‹ 5 seconds andfull lenticule scanning in ‹ 10seconds, minimizing procedure time and enhancing surgical workflow efficiency. 2.INTELLIGENT:Intelligent Navigation:Dynamic Eye Tracking & Compensation FineVisu 2000* provides intelligentcentration guidance with Kappaangle compensation, enabling precisealignment based on the corneal vertex. Its integrated refractive workstation compensates for intraoperative ocular cyclotorsion caused by patientpositioning changes, improvingastigmatism correction accuracy and ensuring consistent surgical precision. 3.Precision Sculpting:Personalized Refractive Solutions FineVisu 2000*features a multi-mode adjustable laser energy systemwith customizable energy levels andsymmetric/asymmetric spot spacingoptions.Combined with topography-guided personalized lenticule design,it enables tailored treatment planningfor diverse corneal conditions,includinghigh astigmatism and thin corneas. Three sizes of curved suction ringsoptimize compatibility with multiple eyeanatomy,providing stable intraoperativefixation and precise laser delivery. 4.An intuitive interface andsimplified workflow make FineVisu 2000* easy tooperate. With stable laserenergy output and precisescanning performance, thesystem enables smoothlenticule separation andextraction, reducingthe learning curve forsurgeons. 5.FineVisu 2000* unifies AI-driven computing and bigdata analytics in a single workstation.By connecting preoperative planning, intraoperative navigation,and postoperative review intoone seamless digital workflow,it enables precision refractive surgery through intelligent algorithms.

1、Fast:＜10s超快透镜扫描速度，＜ 5s超快角膜瓣制作，大幅减少术中手术时间，提高整体手术效率； 2、Intelligent:具备智能、多种中心定位导航功能和眼球旋转补偿功能，提高屈光度矫正准确性； 3、Nine：透镜雕刻更精准，术后恢复更快捷，搭载多模式可调激光能量系统，支持激光能量分级调节，自由切换对称/非对称点间距模式；结合个性化角膜地形图引导透镜设计*,针对大散光、薄角膜等差异化眼部条件，智能匹配专属切削方案，实现千人千面定制化手术。 三种尺寸弧形负压环适配亚洲人眼部结构，生物相容材质透光性优异，术中负压稳定，切削精度全程可控； 4、Easy:操作流程简洁易懂；激光能量输出均匀稳定，全层扫描光斑细腻，术中透镜分离、取出流程顺滑流畅，有效缩短医师上手学习曲线 5、搭载AI智能运算+大数据分析一体化工作站，打通术前规划、术中导航、术后复盘全流程数字化闭环，依托智能算法赋能精准屈光手术。

05 shoulder prosthesis 肩关节假体

Specification 规格： Ø36mm Ø38mm Ø40mm Ø42mm Ø44mm

Available in five sizes to meet the needs of different patients. Featuring a unitary structure design, the prosthesis rests directly on the humeral resection plane for enhanced stability. Medial and lateral fixation holes provide additional fixation support. The slender proximal design helps preserve more bone stock, facilitating tuberosity attachment. The slotted design promotes better bone cement ingrowth, while the tapered stem design prevents postoperative prosthesis rotation.

5种规格，适合不同患者的需求；整体式结构设计，假体直接位于肱骨截面上，更加稳定；内外侧固定孔，提供额外的固定支撑；纤细的假体近端设计，有助于保留更多的骨量以利于结节的附着；带槽设计，更利于骨水泥长入；锥形柄设计，防止术后假体旋转

Shanghai LungHealth MedTech Co., Ltd.

上海朗合医疗器械有限公司

Medical Devices 医疗器械 | Employees 员工：150 | www.lunghealth.cn

Langhe Medical is a world-leading medical surgical robotics company, founded in 2015 at Shanghai Zero-Bay Global Innovation & Entrepreneurship Cluster. As the lead organization for the key special project “R&D of Trans-respiratory Tract Diagnostic and Therapeutic Robotic System” under the 14th Five-Year National Key R&D Program, the company maintains in-depth research partnerships with Tsinghua University and Shanghai Jiao Tong University. In 2021, it launched China’s first flexible endoscopic surgical robot with fully independent core intellectual property rights for natural-orifice transluminal surgery.Focusing on minimally-invasive tumor intervention, the enterprise develops a portfolio of innovative products covering endoscopes and bronchoscopic navigation robots, dozens of which have been installed and deployed for clinical use in Grade-A tertiary hospitals across China. The company has received numerous national and provincial honors, and is recognized as a Potential Unicorn Enterprise in Jiangsu Province. It holds EU CE certification and China quality system certification, and has completed multiple rounds of financing totaling hundreds of millions of RMB.Its R&D and marketing headquarters is located in Shanghai. A 5,000-square-meter GMP-compliant production, pilot-test and demonstration base has been built in West Taihu Medical Device Industrial Park, Changzhou, Jiangsu Province.

朗合医疗是全球领先的医疗手术机器人科技公司，2015年在上海零号湾全球创新创业集聚区创办。作为“十四五”国家重点研发计划“经呼吸道诊疗机器人系统研发”重点专项牵头单位，公司与清华大学、上海交通大学深度科研合作，2021年推出中国首台具备全部核心自主知识产权的经自然腔道柔性内窥镜手术机器人。 企业深耕肿瘤微创介入领域，布局内窥镜、支气管镜导航机器人等方向，形成数十款创新产品，已在多地三甲医院实现装机与临床应用。公司斩获多项国家级、省级荣誉，获评江苏省潜在独角兽，拥有欧盟CE、中国质量体系认证，累计完成数亿元多轮融资。研发营销总部位于上海，在江苏常州西太湖医疗器械产业园建成5000㎡GMP生产、中试及展示基地。

01 5G-enabled Module for Polaris™ Bronchoscopic Navigation Robot 北极星支气管镜导航机器人5G模块

Specification 规格： No

1、5G Low-Latency Remote Control: It achieves hand-eye synchronization between operation commands and surgical images. The catheter provides sub-millimeter-level manipulation accuracy, and clinical validations of remote respiratory endoscopic surgeries over a distance of up to 5,000 kilometers have been completed.2、AI-empowered Integrated Navigation: Equipped with the robot's native AI algorithms, the system automatically reconstructs 3D bronchial trees from patients' CT images and generates optimal insertion paths by AI. Intra-operative autonomous AI spatial registration compensates for lung deformation caused by respiration and improves the localization accuracy of peripheral pulmonary nodules.3、Integration of Embodied Intelligence and Magnetic Navigation: The 5G communication link is deeply coupled with magnetic positioning and flexible manipulator control. The robot retains full intra-operative positioning and flexible steering capabilities under remote operation. Multiple real-world 5G-assisted remote human clinical surgeries have been accomplished for the first time domestically. This technology serves as a core component of the key special project under China's 14th Five-Year National Key R&D Program.4、Domestically-developed Full Core Intellectual Property: It supports new modes of tiered medical care and telemedicine, and can be applied for remote expert guidance, hands-on remote surgery and cross-hospital clinical training.

1、5G 低时延远程控制：实现操作指令与手术画面手眼同步；导管亚毫米级操控精度，完成五千公里级远程呼吸内镜手术临床验证。2、AI 智能导航融合：搭配整机 AI 算法，基于患者 CT 影像自动重建 3D 支气管树、AI 自动规划最优进镜路径；术中 AI 自主空间配准，补偿呼吸带来肺部形变，提升肺外周结节定位准确率。3、具身智能+磁导航融合：5G 通信链路与磁定位、柔性机械臂控制深度耦合，远程状态下保留机器人全部术中定位、柔性转向能力；国内率先完成多例真实 5G 远程人体临床手术，属于十四五国家重点研发计划核心技术组成部分。4、全核心知识产权国产化：支持分级诊疗、远程医疗新模式，可用于专家远程指导、远程手术实操、跨院教学培训。

Shanghai Upstream Health Technology Limited

上海正康曦健康科技有限公司

Medical Devices 医疗器械 | Employees 员工：30

Zhengkangxi is an innovative pioneer of medicine-sports integration in Shanghai and a strategic partner of Jiushi Sports. Adhering to the philosophy of "Health-Oriented Nurturing in Four Dimensions", it focuses on full-life-cycle proactive health management. Its over 4,000-sq-m experience center in Lujiazui generates digital health profiles via intelligent diagnosis, delivers customized plans covering fitness, conditioning, mental wellness and nutritional care, and optimizes interventions dynamically with AI to realize the "assessment-regulation-nurturing-prevention" service chain. It provides one-stop sustainable holistic health management solutions for individuals and enterprises.

正康曦是上海医体融合创新先行者，为久事体育战略合作伙伴。秉持 “健康心养，四位一体” 理念，聚焦全生命周期主动健康管理。陆家嘴拥有 4000 余平米体验中心，以智能诊断生成数字化健康档案，落地 “健、康、心、养” 定制方案，依托 AI 动态迭代干预计划，打通 “测-调-养-防” 服务链路，为个人与企业提供一站式可持续全维健康管理整体解决方案。

PRODUCTS 产品 (2)

01 Walking Assist Exoskeleton Robot 行走助力外骨骼机器人

Specification 规格： 黑色

Ultra-lightweight, AI-powered and ultra-long-lasting. Specially designed for daily commutes and various activity scenarios, this mobility-assist device delivers both medical-grade safety and consumer-level convenience. Equipped with high-precision sensors, it captures human motion in real-time and intelligently adjusts assistive output following ergonomic principles for a more natural and comfortable user experience. Breaking physical limitations, it empowers diverse users to move freely and enjoy life with ease.Applicable scenarios include community walking, stair climbing, home-based rehabilitation, occupational assistance and sports & fitness. Featuring motion-learning capability, the device dynamically adjusts assistive force via intelligent algorithms. It adapts to a wide range of movement gaits: regular walking, race walking, jogging, stair climbing, slope ascent and descent, and even asymmetric abnormal gaits for certain users.Specifications- Range: 12.5 km- Max. supported speed: 12 km/h- Battery duration: 4.5 h- Total weight: 1.9 kg- Assist-force levels: 4 gears- Maximum torque: 24 Nm

超轻量 、AI 动力、超长续航，专为日常出行与各类活动场景设计，是一款兼具医疗级安全性能与消费级便捷体验的行动辅助设备，产品搭载高精度传感器，可实时捕捉人体运动状态，并依据人体工学原理，智能适配输出助力，带来更自然舒适的使用体验。打破身体机能局限，助力各类人群自由行动，轻松享受生活。适用社区步行、爬楼梯、家庭康复、职业作业助力、运动健身。设备具备运动学习能力，依靠智能算法实时调节助力。可适配多种运动姿态，包括普通行走、竞走、慢跑、爬楼梯、上下坡道，甚至部分使用者不对称的异常步态。续航12.5 千米，最大支持速度12 千米 / 小时，电池续航时长4.5 小时，整机重量1.9 千克，助力档位4 档，最大扭矩24 牛・米。

02 DUAL-ESSENCE LYOPHILIZED SOOTHING ESSENCE MILK 双粹冻干舒肤精华乳

Specification 规格： 白色

2-in-1 Dual-Chamber Fresh-Lock I Herbal Plant Extracts I Lyophilization TechnologyCombining classical clinical prescriptions, research achievements and professional standards, we develop a high-quality TCM daily-use soothing essence lotion that is safe, effective and traceable.(1) Drawing on our proprietary strengths, we deploy a Chinese herbal extract composition derived from the inventor's in-hospital preparation **Wuwei Xiaodu Decoction**. An in-hospital preparation is a fixed classical formula approved for internal use within TCM hospitals or TCM departments. It is developed strictly in accordance with TCM therapeutic principles, supported by more than 5 years of human clinical experience, with its efficacy and safety fully validated by clinical practice.(2) Built on modern biological omics mechanisms and solid evidence for precise targeting of sensitive skin, a bioactive protein component with stem-cell-like properties is introduced. It synergizes with the herbal extract component to achieve stable co-existence and enhanced performance within the formula system.(3) A liposomal lyophilization protection system is customized for the bioactive protein component, which preserves high protein activity while enabling effective transdermal release.(4) A nano-scale microcrystalline emulsion solvent enables efficient integration, stabilization and transdermal absorption of herbal extracts and lyophilized bioactive-protein liposomes.Our dual-chamber lyophilized preparation adopts separated 2-in-1 packaging for the bioactive protein component and herbal extract component. Mix immediately before use to lock in activity and freshness for high efficiency and easy operation.

2 合 1 双仓锁鲜草本植萃，冻干工艺，汇聚临床经方、科研成果与专业标准，打造安全、有效、可溯源的高品质中医药日化舒缓精华乳：（1）基于自身优势，提供一种中药提取物组分。该中药提取物组分基于发明人院内制剂 “五味消毒饮”，所谓院内制剂，就是在中医院或中医科严谨依据中医治则、具有 5 年以上人用临床经验、经批准可内部使用的固定处方或经方制剂。其效果与安全性经临床充分验证；（2）基于对皮肤敏感更精准靶向的现代生物组学机理与完整实证，提供一种具备干细胞属性的生物活性蛋白组分，与中药提取物组分协同使两者在配方体系中稳定共存并产生协同增效作用；（3）提供一种针对生物活性蛋白组分的脂质体冻干保护体系，实现蛋白高活性保持与有效透皮释放的统一；（4）提供一种纳米级微晶乳溶媒，促进中药提取物组分和生物活性蛋白脂质体冻干的高效融合、稳定与透皮吸收；提供一种双舱冻干制剂，实现生物活性蛋白组分与中药提取物组分二合一隔离包装，即用即混，锁活保鲜，高效、便捷。

Shanghai Feiman Medical Technology Co. LTD

Medical Devices 医疗器械 | Specialised & Innovative Enterprise · 专精特新企业 | Employees 员工：58 | www.feymed.com

Shanghai Feiman Medical Technology Co., Ltd. is a comprehensive medical device manufacturer integrating R&D, production, sales and service. Its main products include carbon-fiber, spinal, orthopedic surgical tables, electro-hydraulic systems, electric-hydraulic surgical tables and complete surgical table accessories. The company has professional production teams and advanced testing equipment. It carries out standard production in accordance with drawings and supports customized processing for end-users. Our professional sales and after-sales team provides pre-sales technical support, order execution and reliable after-sales service. Adhering to the tenet of "quality priority, quality wins, integrity first", we strive for excellence to provide high-quality products and services for customers.

上海飞曼医疗科技有限公司是集研发、生产、销售、服务为一体的综合性医疗器械厂家，主营碳纤维、脊柱、骨科手术台，电控液压系统、电动液压手术台及手术床全套配件。 公司拥有专业生产团队与先进检测设备，可按图纸标准化生产，支持客户定制加工。配备专业销售技术及售后团队，提供售前技术支持、订单履约及及时的售后保障。公司恪守“品质优先，质量取胜，诚信第一”宗旨，精益求精，为客户提供优质产品与服务。

01 Electric operating table 电动手术台

Specification 规格： AT600-B

AT600-B Multi-functional Electro-hydraulic Operating Table Adopting high-performance electro-hydraulic drive, the tabletop realizes multi-angle adjustments including lifting, trendelenburg/reverse trendelenburg, lateral tilt and back-plate flexion. With X-ray radiolucent tabletop compatible with C-arm machine, it is widely used in orthopedics, general surgery, urology, gynecology and other departments. Various surgical accessories are optional to meet complex surgical posture requirements. **Powerful & Stable Electro-hydraulic System** High load capacity, smooth lifting and tilting movement with low noise and sensitive response. It works stably for long-time operation without jamming to guarantee reliable surgery. **Safety Protection & Convenient Operation** Easy-to-use wired hand-held controller with travel-limit protection to avoid over-travel misoperation. High-level protection grade, waterproof tabletop for easy cleaning and disinfection, perfectly suitable for operating-room environment.

AT600-B 多功能电动液压手术台 本机采用高性能电动液压驱动，台面可完成升降、前后倾、左右倾、背板折转等多角度体位调节。床面支持 X 光透视，兼容 C-臂机，广泛应用于骨科、普外科、泌尿外科、妇产科等多科室手术，可选配各类手术辅助附件，满足医院复杂手术体位需求。 • **强劲稳定电动液压系统** 负载能力强，升降、摆动运行平稳，整机噪音低，调节响应灵敏，长时间连续工作不易卡顿，保障手术开展稳定可靠。 • **安全防护与便捷操控** 配备有线手持控制器，操作简便；自带限位保护，避免超程误操作。整机防护等级优异，床面防水，便于清洁消毒，适配手术室严苛使用环境。

02 Carbon fiber three-pin holder 颅脑手术头架

Specification 规格： FP-026-C

Introduction: Carbon fiber three-pin holder is used for head fixation in neurosurgery. Made of carbon-fiber with good radiolucency for C-arm imaging. Multi-direction adjustable for different head sizes.Highlights: ①Carbon-fiber radiolucent structure, no obstruction for X-ray imaging; ②Reliable multi-point locking, flexible angle adjustment; ③Light-weight, easy installation & removal.

碳纤维三点头架，用于颅脑神经外科手术中固定患者头部，碳纤维材质具备良好 X 光透视性能，不遮挡 C-臂成像，多向角度可调节，适配不同患者头部尺寸。亮点：①碳纤维材质，可透视，术中影像无遮挡；②多点锁紧结构，固定稳固，角度调节灵活；③轻量化设计，拆装便捷。

03 Three needle frame 颅脑手术头架

Specification 规格： FP-026-B

Product Introduction: The three-pin cranial head frame is specially used for neurosurgery. It clamps and fixes the patient's head with a three-pin structure, supports multi-angle rotation adjustment, and adapts to various cranial surgical postures.Highlights:① Three-pin fixation provides firm clamping to prevent head displacement during surgery;② Multi-dimensional angle adjustment meets the requirements of complex surgical postures;③ Sturdy structure, compatible with most operating tables.

产品介绍：三钉颅脑手术头架，神经外科手术专用，三点钉式夹持固定头颅，可多角度旋转调节，适配各类颅脑手术体位。亮点：①三点钉固定，夹持牢固，防止术中头部移位；②多维角度调节，满足复杂手术体位；③结构坚固，适配绝大多数手术台。

04 Headstock adapter 头架转接架

Specification 规格： FP-025-C2

Headstock adapter is the connecting component for mounting head frames onto operating tables, supports horizontal & longitudinal fine-tuning, compatible with multiple head frame models.Highlights: ①Quick assembly with reliable locking; ②Multi-dimensional fine position adjustment; ③Strong compatibility for various head frames and table rails.

头架转接架，作为连接过渡配件，实现颅脑头架与手术台台面快速对接，可横向、纵向位置微调，适配多款头架型号。亮点：①快速拆装，定位锁紧可靠；②多维度位置微调；③通用性强，适配多种头架及手术台导轨。

05 Arc spine operation rack 脊柱手术体位架

Specification 规格： FP-016-B2

Arc spine operation rack is applied for prone-position spinal surgery. Arc-shaped structure supports chest and abdomen to disperse body pressure, compatible with C-arm fluoroscopy.Highlights: ①Ergonomic arc design reduces pressure sore risk; ②Large radiolucent area for intraoperative X-ray; ③Easy to assemble, fits most operating tables.

弧形脊柱手术体位架，用于脊柱外科俯卧位手术使用，支撑患者胸腹部，弧形结构分散身体压力，兼容 C-臂 X 光透视。亮点：①弧形人体工学设计，分散身体压迫，减少压疮风险；②大透视区域，便于术中拍片；③拆装简单，适配各类手术台。

06 Spider arm 外科手术固定装置

Specification 规格： FP-066-C1

Introduction: Spider-arm surgical fixing device with multi-joint universal adjustment for limb and trunk fixation. Complete set with clamps and connectors, portable storage case included.Highlights: ①Universal multi-joint flexible positioning; ②Full-set accessories with portable storage box; ③Firm clamping without blocking surgical view.

蜘蛛臂外科固定装置，多关节可万向调节，术中对人体肢体、躯干进行辅助固定，整套含多组夹具、连接件，收纳便携。亮点：①多关节万向自由调节，定位灵活；②整套配件齐全，收纳箱包装，便于转运存储；③夹持稳固，不遮挡手术视野。

07 Stapes leg frame 马镫形多功能腿架

Specification 规格： FP-006-A

ntroduction: Stapes leg frame is used for urology, gynecology and endoscopic surgery. Supports, elevates and abducts patient's legs with adjustable height and angle, padded cushion for leg protection.Highlights: ①Ergonomic padded stapes to reduce leg compression injury; ②Multi-dimensional height & angle adjustment; ③Easy disassembly, compatible with operating tables.

马镫形多功能腿架，用于泌尿外科、妇科、腔镜手术，支撑、抬高、外展患者双腿，可调节角度与高度，软垫保护腿部。 亮点：①人体工学马镫软垫，保护腿部，降低压伤；②高度、角度多维度可调；拆装方便，适配手术台。

Shanghai Shandi Medical Technology Co., Ltd.

上海山地医疗器械科技有限公司

Medical Devices 医疗器械 | Employees 员工：10

Founded in 2018, Shanghai Shandi Medical Technology Co., Ltd.is dedicated to providing professional services in the medical device industry. The company is committed to building an interactive platform in the digital medical sector, with a particular focus on AI-driven medical solutions and additive manufacturing in healthcare. It brings together 600 experts and 400 manufacturers from China's digital medical field, integrating resources both domestically and internationally. By serving as a strategic bridge among government agencies, hospitals, and enterprises, the company facilitates the standardized development of the medical device industry and promotes collaboration and knowledge exchange.

上海山地医疗器械科技有限公司成立于2018年，以医疗器械行业专业服务为核心，公司致力于搭建AI医疗、增材制造医疗等数字医疗领域的交互平台，汇聚中国数字医疗领域600位专家与400家厂商，整合中国与国际行业资源，在政府、医院与企业之间发挥桥梁纽带作用，推动医疗器械行业行业的规范发展与交流合作。

LOOKING FOR AT THE FAIR 参展需求

1.Gain a thorough understanding of local market demand for our products and the relevant policies for market entry in Malaysia; 2.Clarify the regulatory requirements and approval procedures for product registration, in order to assess the feasibility and cost of the compliance pathway; 3.Should the direct registration process prove overly complex or timeconsuming, we would also like to explore alternative flexible entry models, such as technical cooperation, licensing/distribution agreements, local assembly, or cobranding.

PRODUCTS 产品 (10)

01 Customized 3D Printed Patient-Specific Anatomical Surgical Model 定制式3D打印人体医学手术模型

Specification 规格： 定制式3D打印

This model is fabricated using 3D printing technology based on patient-specific CT and MRI data, accurately reproducing the patient's anatomical structures. Made from polymer materials (e.g., photosensitive resin) and delivered non-sterile, it enables clinicians to visually inspect lesion anatomy, understand complex spatial relationships, and perform surgical simulations and practice on the model, thus supporting surgical planning and preoperative decision-making. Highlights： -1:1 accurate replication of anatomy based on real patient imaging data -Facilitates preoperative planning, reduces intraoperative time, and lowers surgical risks -Capable of printing bones, organs, and various tissues to meet multidisciplinary needs -Supports multi-material composite printing to simulate different tissue textures

该产品基于患者CT、MRI等影像学数据，通过三维重建和3D打印技术制成，可精确还原患者解剖结构。产品一般采用高分子材料（如光敏树脂）经3D打印制成，用于帮助临床医生直观观察病灶部位解剖结构，理解复杂解剖关系，在模型上进行手术模拟和操作练习，为制定手术方案和术前规划提供指导。 亮点： -基于患者真实影像数据，解剖结构1:1精准还原 -辅助术前规划，缩短术中时间，降低手术风险 -可打印骨骼、器官等多种人体结构，满足不同科室需求 -支持多材料复合打印，模拟不同组织质感

02 Personalized 3D Printed Surgical Guide 个性化3D打印手术导板

Specification 规格： 个性化3D打印

This product is a patient-specific surgical aid designed using computer-aided design and 3D printing based on the planned surgical approach. Derived from CT/MRI data and made of polymer materials via 3D printing, it is provided non-sterile and used for positioning, guidance, and assessment in orthopedic, neurosurgical, and other surgeries. Acting as a “GPS navigation” for surgery, it physically bridges the digital surgical plan (based on imaging data) and the actual operative steps (drilling, osteotomy, screw placement). Highlights： -Sub-millimeter positioning accuracy ensures precise execution -Simplifies the surgical workflow and shortens operation time -Widely applicable in orthopedics, neurosurgery, maxillofacial surgery, and more -Allows integration of multiple cutting/drilling guide positions on a single guide

该产品是根据拟定手术方案，借助计算机辅助设计和3D打印技术制作的个性化手术辅助工具。基于患者CT/MRI数据，经过三维重建后采用高分子材料经3D打印制成。产品以非无菌状态提供，用于骨科、神经外科等手术中的定位、导向和评估。导板如同手术“GPS导航”，是将医生的数字规划（基于CT/MRI数据）与实际手术操作（钻孔、截骨、置钉）连接起来的物理桥梁。 亮点： -高定位精度，确保手术精准执行 -简化手术操作流程，缩短手术时间 -广泛适用于骨科、神经外科、颌面外科等多科室 -可集成多个切割/钻孔引导位置于单一导板上

03 Personalized 3D Printed Orthopedic Prosthesis 个性化3D打印骨科假体

Specification 规格： 个性化3D打印

This product is a customized orthopedic implant manufactured using 3D printing technology based on patient CT data, digital reconstruction, and personalized design. 3D printing enables the transformation of orthopedic implants from “off-the-shelf” to “patient-specific,” allowing the fabrication of implants that perfectly match the patient’s anatomy and mechanical requirements. Made of biocompatible materials via additive manufacturing, it is used in bone defect repair, joint reconstruction, and other orthopedic procedures. Highlights: -Perfectly matched to the patient’s individual anatomy for truly personalized treatment -Porous structure design promotes bone ingrowth and biological fixation -Excellent biocompatibility and mechanical properties -Shortens postoperative recovery and improves long-term clinical outcomes

该产品基于患者CT数据，通过数字化重建和个性化设计，利用3D打印技术制造的定制化骨科植入假体。3D打印技术实现了骨科植入物从“通用”到“专用”的转变，可制备完全匹配患者解剖结构与力学需求的植入物。产品采用生物相容性材料，通过增材制造工艺成型，用于骨缺损修复、关节重建等骨科手术。 亮点： -完全匹配患者个体解剖结构，实现真正个性化治疗 -多孔结构设计促进骨长入，实现生物固定 -优异的生物相容性和力学性能 -缩短术后康复周期，提升远期临床效果

04 Personalized Additively Manufactured Interbody Fusion Cage 个性化3D打印椎间融合器

Specification 规格： 个性化3D打印

This product is manufactured using 3D printing technology with metal powder via a laser melting process. It is designed for use in spinal interbody fusion surgery to support the intervertebral space and promote bone fusion. The biomimetic porous structure facilitates bone ingrowth and biological fixation. Highlights： -3D-printed biomimetic porous structure promotes bone ingrowth and biological fixation -Excellent mechanical strength and biocompatibility -Personalized design to match patient anatomy

该产品采用3D打印技术，利用金属粉末经激光熔融成型工艺制成。产品，用于椎间融合手术中支撑椎体间隙、促进骨融合。产品仿生多孔结构设计有利于骨长入和生物学固定。 亮点： -3D打印仿生多孔结构，促进骨长入与生物固定 -优异的力学强度和生物相容性 -个性化设计，匹配患者解剖形态

05 Personalized 3D Printed Porous Joint Augment 个性化3D打印多孔型关节填充块

Specification 规格： 个性化3D打印

This product is a personalized 3D-printed porous filler block designed for bone defect reconstruction in joint arthroplasty. Custom-designed based on patient CT data and manufactured using 3D printing technology, it features a biomimetic porous structure. It provides immediate structural support while promoting bone ingrowth through its porous design for long-term biological fixation. It is suitable for bone defect reconstruction in complex primary or revision joint arthroplasty. Highlights： -Custom-designed to precisely match individual bone defects -Porous structure offers dual functions of immediate support and long-term biological fixation -Excellent biocompatibility -Suitable for complex primary and revision joint arthroplasty

该产品是针对关节置换术中骨缺损修复而设计的个性化3D打印多孔填充块。基于患者CT数据定制设计，采用3D打印技术制造，具有仿生多孔结构。产品既满足即时结构支撑需求，又通过多孔设计促进骨长入，实现长期生物学固定。适用于复杂初次或翻修关节置换术中的骨缺损重建。 亮点： -针对患者个体骨缺损定制设计，精准匹配 -多孔结构兼具即时支撑与长期生物固定的双重功能 -优异的生物相容性 -适用于复杂初次及翻修关节置换手术

06 3D Printed Denture 3D打印义齿

Specification 规格： 个性化3D打印

This product is a denture fabricated using digital 3D printing technology. Intraoral scanning captures the patient's oral data, followed by CAD design and one-piece 3D printing. It can be used as a complete denture or removable partial denture to replace missing teeth and associated structures. The 3D-printed denture offers a precise fit, natural aesthetics, and a comfortable wearing experience. Highlights： -Digital workflow ensures accuracy, efficiency, and rapid delivery -One-piece printing eliminates the need for adhesives -Customizable crown shades for natural aesthetic results -Excellent fit and wearing comfort

该产品通过口内扫描获取患者口腔数据，经CAD设计后利用3D打印技术一体成型。产品可用于全口义齿或可摘局部义齿，替代缺失牙列及其相关结构。3D打印义齿具有精准的密合度、自然的美学效果和舒适的佩戴体验。 亮点： -数字化工作流程，精准高效，快速交付 -一体化打印成型，无需粘合剂粘接 -可定制牙冠色泽，实现自然美学效果 -优异的密合度和佩戴舒适性

07 3D Printed Dental Implant 3D打印种植体

Specification 规格： 个性化3D打印

This product is a dental implant manufactured using 3D printing technology, typically with metal powder via a laser melting process. It features a dense core to ensure overall strength and a porous surface to stimulate bone growth. 3D printing enables high design flexibility, allowing personalized customization. The implant serves as a replacement for the natural tooth root, providing stable support for the suprastructure. Highlights： -Dense core + porous surface design balances strength and osseointegration -3D printing enables precise fabrication of complex microstructures -Titanium alloy offers outstanding mechanical properties and biocompatibility -Personalized design to meet various clinical needs

该产品是采用3D打印技术制造的牙科种植体，通常以金属粉末为原料经激光熔融成型。产品设计有致密核心以保证整体强度，外部多孔表面可刺激骨生长。3D打印技术赋予种植体高度设计灵活性，可实现个性化设计。种植体用于替代天然牙根，为上部修复体提供稳定支撑。 亮点： -致密核心+多孔表面设计，兼顾强度与骨结合 -3D打印技术实现复杂微观结构精准制造 -钛合金材质，优异的力学性能和生物相容性 -个性化设计，匹配不同临床需求

08 3D Printed Removable Partial Denture Framework 3D打印可摘局部义齿支架

Specification 规格： 个性化3D打印

This product is manufactured using 3D printing technology, based on intraoral scanning and CAD design, to precisely shape complex structures including clasps, connectors, and bases. The framework supports artificial teeth and is retained in the oral cavity via clasps or other retainers, serving to restore partial edentulism. Compared with traditional casting, the 3D-printed framework offers a better fit, lighter weight, and shorter production lead time. Highlights： -Precisely 3D-printed for an excellent fit to oral tissues, ensuring stable and comfortable wear -Lightweight design (especially with PEEK material) reduces foreign-body sensation -Complex clasps and connectors are formed in a single piece without welding, ensuring structural integrity -Flexible material options -Digital workflow shortens production turnaround, significantly reducing patient waiting time

该产品采用3D打印技术制造，基于口内扫描和CAD设计，产品精准成型，包括卡环、连接体、基托等复杂结构。支架为人工牙提供支撑，并通过卡环等固位体固定在口腔内，用于牙列缺损的修复治疗。相比传统铸造工艺，3D打印支架具有更高的密合度、更轻的重量和更快的制作周期。 亮点： -3D打印精准成型，支架与口腔组织高度密合，佩戴稳固舒适 -轻量化设计（尤其PEEK材料），减轻异物感 -复杂卡环和连接体一次成型，无需焊接，结构完整 -材料选择灵活 -数字化流程缩短制作周期，患者等待时间大幅减少

09 3D Printed Cultural & Creative Products / Figurines / Toys 3D打印文创/手办/玩具

Specification 规格： 个性化3D打印

The product range covers various categories including full-color figurines, collectible figures, articulated models, art toys, and more. Using processes such as photopolymerization and full-color 3D printing, and employing eco-friendly materials, it can achieve complex shapes, fine details, and rich colors, satisfying demands for personalized customization and creative expression. Highlights： -Accurately reproduces complex shapes and fine details -Supports full-color printing with rich colors and natural gradients -Supports personalized customization and rapid small-batch production -Eco-friendly materials, safe and non-toxic

产品涵盖全彩人偶、公仔、关节可动模型、艺术玩具等多个品类。采用光固化、全彩3D打印等多种工艺，使用环保材料，可实现复杂造型、精细细节和丰富色彩，满足个性化定制和创意表达需求。 亮点： -复杂造型和精细细节精准呈现 -支持全彩打印，色彩丰富、渐变自然 -支持个性化定制，小批量快速生产 -环保材料，安全无毒

10 3D Printed Shoes 3D打印鞋

Specification 规格： 云川

The footwear is integrally formed via 3D printing using flexible polymer materials. The sole features a biomimetic lattice structure that delivers excellent energy return and cushioning performance. 3D-printed footwear condenses dozens of traditional shoemaking steps into a three-step process—scan, design, print—enabling rapid customized production. Highlights： -One-piece molding eliminates the need for adhesives, making it eco-friendly -Biomimetic lattice structure provides over 75% energy return -Precision grid pores create natural convection channels for breathability and comfort

采用高分子柔性材料经3D打印一体成型。鞋底采用仿生晶格结构设计，具有优异的能量回馈和缓震性能。3D打印鞋将传统制鞋数十道工序压缩为“扫描-设计-打印”三步，实现快速定制生产。 亮点： -一体成型工艺，无需胶水粘合，绿色环保 -仿生晶格结构，能量回馈率超75% -精密网格孔隙形成天然对流风道，透气舒适

Shanghai Twinsmed Medical Technology Co., Ltd.

上海孪心医疗科技有限公司

Medical Devices 医疗器械 | Employees 员工：50 | www.twinsmed.cn

Shanghai Twinsmed Medical Technology Co., Ltd. is a high-tech firm focused on computational physics and AI. It serves healthcare systems and consumer health, providing single-/12-lead dynamic ECG, ambulatory BP, portable cardiac

上海孪心医疗科技有限公司是一家专注计算物理与人工智能的高新技术企业。公司面向医疗系统与消费级健康管理，提供单导联/十二导联动态心电、动态血压、便携心脏超声与AI诊断云平台，

ultrasound and an AI diagnostic cloud platform—covering AF screening, heart-failure volume management and hypertension diagnosis—to improve care access and cut costs via wearable, remote solutions.

覆盖房颤早筛、心衰容量管理、高血压诊断等场景，以可穿戴与远程化手段提升诊疗可及性、降低医疗成本

LOOKING FOR AT THE FAIR 参展需求

To showcase TWINSMED's intelligent cardiovascular monitoring and AI diagnostic solutions — including dynamic ECG, ambulatory blood pressure, portable cardiac ultrasound, the AI diagnostic cloud platform and smart health ring — at the Indonesia–Malaysia exhibition; to explore local distribution and partnership opportunities; and to expand our presence in the Southeast Asian healthcare market.

PARTNERSHIP MODEL 合作模式

We are open to National Distributor, OEM/ODM contracts and Direct Project Supply. We currently have no prior cooperation in the Indonesia–Malaysia region and look forward to establishing partnerships through this exhibition.

LOCAL INVESTMENT INTEREST (MY/ID) 当地投资意向

No

PRODUCTS 产品 (6)

01 TWINSMED AI Diagnostic Cloud Platform TWINSMED AI智能诊断云平台

An integrated AI diagnostic cloud platform powered by biomedical algorithms, enabling automatic analysis and remote diagnosis of ECG and blood-pressure data. [AI / Tech highlight] It automatically detects 80+ / 98+ types of ECG abnormalities, with second-level event recognition, real-time alerts and one-click personalized reports; supports tiered diagnosis and the "Internet+" model, empowering primary-care physicians and closing the loop of cloud-based remote diagnosis.

基于生物医学AI算法的一体化智能诊断云平台，支撑心电、血压等数据的自动分析与远程诊断。【AI / 科技 / 创新亮点】自动识别12大类80+及16大类98+种心电异常事件，事件秒级识别、实时预警、个性化报告一键生成；支持分级诊疗与“互联网+”模式，赋能基层医生、降低诊断难度，实现心电 / 血压数据的云端汇聚与远程诊断闭环。

02 12-Lead Dynamic ECG Recorder 十二导联动态心电记录仪

A long-term 12-lead dynamic ECG recorder with smart power management and innovative algorithms for high diagnostic accuracy, seamlessly integrated with medical-insurance billing. It automatically analyzes 98+ types of ECG abnormalities (ventricular hypertrophy, myocardial infarction, ischemia, etc.) and offers full-lead auto-analysis, scatter-plot, HRV assessment, second-level event detection, noise reduction and personalized reports. Benefiting from insurance "per-day" pricing, it addresses both primary-care and consumer-health markets.

长程连续十二导联动态心电监测设备，智能能耗管理满足长程监测，创新算法提升诊断准确性，无缝对接医保支付。自动分析16大类98+种心电异常事件（房室肥大、心肌梗死、心肌缺血等），功能涵盖全导联自动分析、散点图深度解析、心率变异率评估、事件秒级识别、信号降噪与个性化报告生成。受益医保按“日”计价改革，覆盖基层医疗与消费级健康管理的双重蓝海市场。

03 Single-Lead Dynamic ECG Patch 单导联动态心电贴

A patch-style single-lead wearable ECG device weighing only 25g with disposable self-powered electrodes (maintenance-free), supporting up to 72-hour single acquisition and 30-day continuous storage. It pairs with mobile/PC apps for quick review and export, with LED/buzzer alerts for lead detachment. Automatically analyzing 80+ ECG abnormalities, it is ideal for AF screening, post-ablation relapse monitoring, drug-efficacy evaluation and long-term follow-up, overcoming the limits of traditional 24h Holter.

贴片式单导联可穿戴动态心电设备，佩戴仅25g、轻巧无感，一次性电极自带电池免维护，单次支持72小时心电采集、30天连续数据存储。配套手机 / 电脑端快速查看与导出，状态灯+蜂鸣器提示导联脱落。自动分析12大类80+种心电异常事件，适用于房颤早筛、消融术后复发监测、药物疗效评估与长期随访，弥补传统24h Holter不足，满足老年人群舒适、低负担、可远程随访需求。

04 Ambulatory Blood Pressure Monitor (ABPM) 动态血压监测仪

The "gold standard" for hypertension diagnosis. Built-in 3G gravity sensor auto-detects posture (motion/lying/sitting); quiet, comfortable measurement with full-waveform clinical research and unrestricted daily activity. The intelligent reporting system analyzes 40+ parameters with trends, scatter plots and histograms, supporting "Internet+" tiered diagnosis. Ideal for newly-diagnosed, masked, resistant and white-coat hypertension and high-risk populations.

高血压诊断“金标准”设备，内置3G重力传感器自动探测运动 / 躺 / 坐立姿势，提供舒适安静的测压环境，支持全波形临床研究、自定义设置且日常活动不受限。智能报告系统支持40+参数分析，提供趋势图、散点图、直方图等可视化，支持“互联网+”分级诊疗。适用于新发 / 隐匿性 / 顽固性 / 白大衣高血压，以及血压波动大、高危人群的鉴别诊断与疗效评估。

05 Portable Color Doppler Ultrasound System 便携式彩色超声多普勒诊断仪

China's first ultrasound continuous-monitoring solution dedicated to the cardiac specialty. Combining hardware acquisition with software analysis, it enables long-term continuous cardiac-function monitoring and dynamic volume analysis, upgrading traditional single ultrasound exams into whole-course trend monitoring. Target departments: cardiology, cardiac surgery, ICU. Indications: heart-failure volume management, continuous LVEF monitoring and long-term/dynamic cardiac assessment, providing clinicians a novel scientific basis.

国内首个针对心脏专科应用的超声持续监测方案，采用硬件采集超声数据与软件统筹分析相结合的模式，实现对心脏功能的长程连续监测及心脏容量的持续动态分析，将传统单次超声检查升级为全程趋势化监测。目标科室：心内科、心外科、重症医学科（ICU）；适用于心衰容量管理、左心室射血分数连续监测及需长期 / 动态评估心脏功能与容量状态的人群，为临床治疗提供全新角度的科学依据。

06 Magico Ring A1 Magico Ring A1 · 睡眠指环

An ultra-light (3–4g, titanium + medical resin) skin-friendly smart health ring with medical-grade PPG SpO2 and ±0.1°C temperature accuracy. [AI / Tech highlight] Core sleep management: precise sleep staging (awake/light/deep/REM), OSA risk screening & alerts, and trend intervention; plus next-day vitality forecast, sports and women's-health management. Powered by the "Xiaolin" biomedical LLM for AI health insights, 7+ days battery, no paid subscription, with exclusive OSA-risk and non-invasive glucose-risk hardware channels.

无感亲肤智能健康指环（仅3–4g，钛合金+医用树脂），医疗级PPG血氧、体温±0.1°C精准监测。【AI / 科技 / 创新亮点】核心睡眠管理：精准睡眠分期（清醒 / 浅睡 / 深睡 / REM）、睡眠呼吸暂停(OSA)风险筛查与预警、睡眠趋势干预；并具备次日活力预测、运动管理与女性健康管理。内置“小麟”生物医学大模型提供AI健康洞察，>7天续航、无付费订阅，独家睡眠呼吸暂停风险监测 + 无创血糖风险评估硬件通道。

Shanghai ATPIO Medical Technology Co., Ltd.

上海先欧医疗科技有限公司

Medical Devices 医疗器械 | Employees 员工：18 | www.atpiobio.com.cn

Shanghai ATPIO Medical Technology Co., Ltd. is committed to delivering innovative technologies and solutions for life science research, clinical diagnosis, and precision medicine. Its business spans five key areas—tumor minimally invasive therapy, peripheral intervention, refined surgery, intelligent healthcare, and pet microwave tumor ablation—offering an integrated product portfolio covering microwave ablation system, radiofrequency ablation system and naying tumor ablation system . Backed by a full R&D-to-service value chain, ATPIO embraces value-based medicine with less trauma, fewer complications, and faster recovery, aspiring to become a globally trusted biomedical brand embraced by doctors and patients worldwide. The company continues to expand its global presence across clinical and research markets.

上海先欧生物医疗科技有限公司致力于为生命科学研究、临床诊断与精准医疗提供创新解决方案，业务覆盖肿瘤微创、外周介入、精细外科、智能医疗及宠物微波肿瘤五大领域，提供微波消融仪、射频消融仪与纳米刀肿瘤治疗系统等产品体系，秉持价值医学理念，以创伤小、并发症少、恢复快的方案，打造全球医生和患者信赖的生物医疗品牌。

LOOKING FOR AT THE FAIR 参展需求

Presented the company's products to teams from Malaysia and Indonesia, and held in-depth discussions on collaboration and technical directions.

LOCAL INVESTMENT INTEREST (MY/ID) 当地投资意向

否

PRODUCTS 产品 (1)

01 Microwave Ablation Device 微波消融仪

Specification 规格： XO-MAS100A

The ATPIO Microwave Ablation System is a minimally invasive tumor-treatment device that, under image guidance such as ultrasound or CT, percutaneously inserts a microwave ablation needle into tumor tissue to inactivate lesions. Operating at 2450 MHz, it offers multiple needle configurations (outer diameter 1.6/2.0 mm, length 100–200 mm) for tumors of different sites and depths. Within the microwave electromagnetic field, polar molecules in the tissue oscillate rapidly and generate frictional heat; as the temperature at the tumor center rises to 45–65°C, cancer-cell proteins denature and necrose. It is indicated for solid tumors including liver cancer, lung cancer, pulmonary nodules, breast tumors, uterine fibroids, kidney cancer, thyroid nodules, and bone tumors, and shows superior efficacy over radiofrequency ablation for larger tumors (>5 cm).Key Advantages: Rapid heating with shorter treatment time; larger ablation zone (especially >5 cm); minimally invasive and precise, with less trauma, less bleeding, and faster recovery. On the technology and innovation front, the device achieves accurate lesion inactivation through precise ablation-boundary control and targeted microwave energy, complementing the limitations of conventional surgery and radio/chemotherapy; it pairs intraoperative real-time imaging monitoring with visualized energy regulation to enhance safety throughout the procedure, integrates an intelligent intraoperative monitoring system and high-end imaging diagnostics for cross-disciplinary innovation, and features multiple self-developed devices that break the monopoly of foreign counterparts to advance the localization of high-end medical equipment.

先欧微波消融仪是一款在超声、CT 等影像引导下，经皮穿刺将微波消融针送入肿瘤组织、以微创方式灭活病灶的肿瘤治疗设备。工作频率 2450MHz，提供多种规格消融针（外径 1.6/2.0mm，长度 100–200mm），适配不同部位与深度的实体肿瘤。其原理是：微波电磁场使组织内极性分子高速摩擦产热，肿瘤中心温度迅速升至 45–65°C，癌细胞蛋白质变性坏死。适用于肝癌、肺癌、肺结节、乳腺肿瘤、子宫肌瘤、肾癌、甲状腺结节、骨肿瘤等实体肿瘤，对直径 5cm 以上的大肿瘤疗效优于射频消融。核心优势：升温快、治疗时间短；消融范围大（>5cm 更优）；微创精准、出血少、恢复快。在科技与创新方面，该设备通过消融边界精准控制与靶向微波能量实现病灶精准灭活，弥补传统手术与放化疗短板；配合术中实时影像监测与可视化能量调控全程提升安全性，并搭载智能术中监护系统与高端影像诊断设备体现跨界融合创新；同时多项自研设备打破国外同类产品垄断，推动高端医疗装备国产化。

PRODUCTS 产品 (4)

01 Ultrasound Modulation Device 穿戴式超声调控仪

Specification 规格： White

Product Introduction:Integrating professional ultrasound technology with a lightweight wearable design, Low-Intensity Pulsed Ultrasound (LIPUS) delivers precise targeted therapy to the affected area, effectively relieving chronic pain, soft tissue contusions, swelling, inflammation and other conditions. Safe and effective, it features lightweight wear and simple operation. Built-in customized electronic treatment protocols easily meet multi-scenario demands including daily health maintenance, injury recovery, and relief from office-related discomforts.Mechanism of Action:1. It precisely targets peripheral nerve trunks, nerve endings and muscular soft tissues, activates mechanosensitive ion channels on cell membranes and raises the pain threshold.2. It promotes local microvascular dilation and lymphatic return, accelerating the metabolic clearance of pain-causing and inflammatory substances such as histamine and bradykinin.3. It up-regulates the expression of neurotrophic factors (NGF, BDNF), facilitating the repair of damaged nerve myelin sheaths and soft-tissue regeneration.Intended Users:Individuals with chronic musculoskeletal pain, joint inflammation, soft-tissue injuries, postoperative rehabilitation and related conditions

产品介绍：融合专业超声技术与轻量化可穿戴设计，低强度脉冲超声(LIPUS)精准靶向作用于患处，可有效缓解慢性疼痛、软组织挫伤、肿胀和炎症等问题。安全有效、佩戴轻便、操作简单，内置专业适配电子处方，轻松满足日常养护、损伤恢复、办公室病舒缓等多场景需求。作用原理：1.精准靶向外周神经干、神经末梢及肌肉软组织，激活细胞膜机械敏感离子通道，提高疼痛阈值2.促进局部微血管扩张与淋巴回流，加速组胺、缓激肽等致痛致炎物质代谢清除3.上调神经营养因子(NGF、BDNF)表达，促进受损神经髓鞘修复与软组织再生。产品适用于：慢性肌肉骨骼疼痛、关节炎症、软组织损伤、术后康复等

CERTIFICATIONS 认证

ISO13845

02 Wearable Ultrasound Muscle-Building Device 穿戴式超声增肌仪

Specification 规格： White

Product Introduction:The Wearable Ultrasound Muscle Builder adopts Low-Intensity Pulsed Ultrasound (LIPUS) technology and non-invasive ultrasound indentation muscle-monitoring technology. It functions through non-thermal mechanical effects and controlled cavitation effects to mimic physiological mechanical stimulation generated by physical exercise. It reverses muscle atrophy and promotes muscle growth at the cellular and molecular levels, with zero radiation, non-invasive operation and no pharmaceutical side effects throughout the whole process.The device quantifies the stiffness of muscle and soft tissues based on the time-of-flight (TOF) difference of ultrasonic signals. It enables non-invasive, real-time and accurate measurement of muscle quality, eliminating the drawbacks of conventional manual palpation such as high subjectivity and incapability of real-time monitoring. It builds a closed-loop rehabilitation system of "Treatment-Monitoring-Assessment-Intervention".Mechanism of Action:1. Activates muscle stem cells (satellite cells): activates the ERK signaling pathway to awaken dormant satellite cells and boost their proliferation and differentiation.2. Repairs mitochondrial function: up-regulates the irisin pathway to improve ATP production efficiency, enhances glucose uptake and utilization, and lays the foundation for muscle growth.3. Restores balanced protein metabolism: promotes the expression of HSP70 protein to accelerate the synthesis of myosin and actin, and significantly down-regulates myostatin (MSTN) to reduce muscle protein degradation.Intended Users:Muscle gain for athletes and fitness enthusiasts; rehabilitation for individuals suffering from sarcopenia and muscle atrophy

产品介绍：穿戴式超声增肌仪采用低强度脉冲超声(LIPUS)技术与超声压痕无创肌肉监测技术，通过非热机械效应+可控空化效应发挥作用，模拟运动产生的生理性机械刺激，从细胞、分子层面逆转肌肉萎缩、促进肌肉生长，全程无辐射、无创且无药物副作用。设备利用超声信号飞行时间差(TOF差)量化肌肉及软组织刚度，能够无创、实时、精准检测肌肉质量，彻底规避传统手动触诊主观性强、无法实时监测的弊端，打造“治疗-监测-评估-干预”闭环康复体系。作用原理：1激活肌肉干细胞(卫星细胞):激活ERK信号通路，唤醒休眠的卫星细胞并促进其增殖分化2修复线粒体功能:上调鸢尾素通路,提升ATP生成效率;改善葡萄糖摄取与利用，为肌肉生长提供基础3重建蛋白质代谢平衡:促进蛋白HSP70表达，加速肌球蛋白、肌动蛋白合成;显著下调肌抑素(MSTN)，减少肌肉蛋白降解。产品适用于：运动员、健身人群增肌，肌少症、肌肉萎缩人群康复

CERTIFICATIONS 认证

ISO13845

03 Ultrasound Multi-Modality Hair Regrowth Cap 超声波多模态生发帽

Specification 规格： 白色

Product Introduction:This product integrates three core technologies: high-frequency energy vibration, red-blue light phototherapy, and ultrasonic transdermal drug delivery. It delivers multi-dimensional synergistic effects to activate dormant hair follicles and optimize scalp conditions, while significantly enhancing the absorption efficiency of hair-regrowth medications. It is suitable for androgenetic alopecia, alopecia areata, postpartum hair loss and post-hair-transplant rehabilitation, featuring reliable safety mechanisms and prominent therapeutic outcomes.Mechanism of Action:1. High-frequency energy vibration activates quiescent stem cells in the hair follicle bulge region and up-regulates the WNT signaling pathway to trigger hair follicles into the anagen phase.2. It dilates scalp capillaries and boosts VEGF expression to increase nutrient supply to hair follicles.3. Ultrasonic cavitation temporarily opens intercellular gaps within the scalp stratum corneum, raising the transdermal absorption rate of hair-regrowth drugs including minoxidil by 8-12 times.4. The combined 630 nm red light facilitates the proliferation of hair matrix cells, while 415 nm blue light suppresses Malassezia infection and chronic scalp inflammation, enabling multi-target synergistic hair regrowth.Intended Users:Individuals suffering from dormant hair follicles, atrophic hair follicles, hair loss, low hair density and receding hairline

产品介绍：产品融合高频能量振动、红蓝光理疗与超声药物透皮三项技术，多维度协同作用激活休眠毛囊、改善头皮环境，同时大幅提升生发药物的吸收效率。适用于雄激素性脱发、斑秃、产后脱发及植发术后修复，机理安全的同时效果显著。作用原理：1.高频能量振动激活毛囊BULGE区静息干细胞，上调WNT信号通路诱导毛囊进入生长期2.扩张头皮毛细血管并促进VEGF表达，提升毛囊营养供给3.超声空化效应可暂时打开头皮角质层细胞间隙，使米诺地尔等生发药物透皮吸收率提升8-12倍4.联合630NM红光促进毛母质细胞增殖，415NM蓝光抑制马拉色菌感染与头皮慢性炎症，实现多靶点协同生发。产品适用于：毛囊休眠、毛囊萎缩、脱发、发量稀疏、发际线后移人群

CERTIFICATIONS 认证

ISO13845

04 Smart Ultrasound Beauty Device 智能超声美容仪

Specification 规格： SLX-100

Product Introduction:Adopting low-power micro-focused ultrasound, low-intensity pulsed ultrasound and dual-frequency fusion technology, this device precisely controls the depth of skin penetration by adjusting ultrasonic frequencies to achieve full-layer skin beauty. Different from the thermal-damage principle of Thermage radiofrequency, it only generates physiological warmth throughout the treatment, with no scabbing and no recovery period. It delivers firming and anti-aging effects as well as skin rejuvenation and brightening results by stimulating collagen regeneration, improving dull skin tone and enhancing serum absorption.Mechanism of Action:1. The 10 MHz low-power micro-focused ultrasound energy is precisely targeted at the dermis at a depth of 1.5-3.0 mm. It activates the ERK1/2 signaling pathway in skin fibroblasts to promote the physiological synthesis of type I and type III collagen as well as elastin, while inhibiting collagen degradation induced by matrix metalloproteinases.2. It dilates dermal capillaries, increases local blood flow, and accelerates the excretion of melanin and metabolic waste.3. Cavitation effect temporarily opens intercellular gaps in the stratum corneum, increasing the transdermal absorption rate of large-molecule serums such as hyaluronic acid and vitamin C by 8-15 times.Intended Users:Individuals for sensitive-skin maintenance, dry-skin nourishment, oily-acne skin conditioning, and skin firming & anti-aging care

产品介绍：采用低功率微聚焦超声、低强度脉冲超声与双频融合技术，通过调节超声波频率精准把控皮肤作用深度，实现皮肤全层次美容。区别于热玛吉射频热损伤原理，全程仅产生生理性温感，无结痂、无恢复期。通过激活胶原再生、改善肤色暗沉、提升精华吸收，实现紧致抗衰、嫩肤提亮效果。作用原理：1.10MHZ低功率微聚焦超声能量精准聚焦真皮层1.5-3.0MM深度，激活皮肤成纤维细胞ERK1/2信号通路，促进I型、III型胶原蛋白及弹性蛋白生理性合成，同时抑制基质金属蛋白酶对胶原的降解2.扩张真皮层毛细血管，提升局部血流量，加速黑色素与代谢废物排出3.利用空化效应暂时打开角质层细胞间隙，使玻尿酸、维生素C等大分子精华透皮吸收率提升8-15倍。产品适用于：敏感肌维护、干皮滋养、油痘调理、紧致抗衰人群

PRODUCTS 产品 (3)

01 Syringe pump 注射泵

Specification 规格： LD-P2020

More ConvenientThe only product in China with the syringe mounted on the top, enabling one-handed operation. SaferThe only product in China that provides full-stroke injection information feedback and tracking for enhanced safety. More AdaptableCompatible with syringes of various brands, with 36 adjustable flow rate levels. Clearer DisplayAdopts a 45° inclined digital tube display, allowing clear observation of operating data from a distance. Ergonomic DesignElegant streamlined and angled appearance for comfortable use.

1、更方便 国内唯-一款注射器安装在正上面,实现单手操作 2、更安全 国内唯-一款注射全行程信息反馈及跟进更安全 3、更适用 配套使用多种品牌注射器,能够36级任意设定流速等级 4、更清晰 国内45度斜面数码管显示,实现远距离清晰观察运行数据 5、更舒适 优雅的流线、角度感造型

02 Infusion pump 输液泵

Specification 规格： LD-P2000

SmarterSensor identifies drip rate and intelligently adjusts the speed. • SaferThe only product in China equipped with an alarm system for excessive deviation between set flow rate and actual flow rate. • More ApplicableNo heating required for the infusion set, ensuring higher control accuracy.

1更智能： 传感器识别滴速，智能化调节快慢:2 2更安全: 国内唯一有设定流速值与实际流速值偏差过大报警系统 3更适用 : 输液器无须采用加热，实现控制保证更高精度

03 Syringe pump 注射泵

Specification 规格： LD-P2020II

LD-P2020 II Dual-channel Syringe Pump is conventional equipment for emergency treatment, therapy and nursing in hospitals. It is used clinically to control the flow rate of liquids (medicinal solution, nutrient solution, blood, etc.) infused into patients, and meets standards for home use scenarios. 1. Higher Reliability: Dual LCD & digital display, avoiding treatment interruption triggered by failure of a single display. 2. Higher Safety: Built-in optical sensor structure to realize full-process injection feedback for safer monitoring. 3. Higher Practicality: Compatible with various brands of syringes, supporting 10ml/20ml/30ml/50ml syringes to fit clinical operations. 4. Clearer View: 45° inclined digital tube display for clear reading of operating data from a long distance. 5. Better Comfort: Elegant streamlined compact design. It is small and lightweight. 6. More Professional: One-key power switch with dual independent channels. Two medications can be infused simultaneously; each channel works independently without mutual interference. 7. Easier Operation: Flip-open structure for convenient syringe loading. Highly integrated design, simple to operate.

LD-P2020 II 双通道注射泵，是医院急救、治疗及护理方面的常规使用设备。产品供临床注入患者体内液体（药液、营养液及血液等）流量用、产品通过家庭应用场景标准。 1、更可靠 液晶数码双显示，解决单一显示故障造成中断治疗； 2、更安全 国内唯一一款内部装有光筛设计，支持注射全过程信息反馈，跟进更安全； 3、更实用 配套使用多品牌注射器，可支持使用 10ml/20ml/30ml/50 注射器，更贴近临床操作 4、更清晰 国内 45 度斜面数码管显示，实现远距离清晰观察运行数据；视觉效果清晰。 5、更舒适 优雅的流线，外观小巧精致，是国内同类产品中体积最小、质量最轻便的产品。 6. 更专业 一键开关，上下双通道设计，可同时使用两种药物输入，也可单独使用其中一个通道，另一个通道不受影响。 7. 更简便 开合设计，方便装夹注射器，机器设计集成度高，操作简单。

Shanghai Haohai Medical Technology Development Co.,Ltd.

Shanghai Haohai Medical Technology Development Co., Ltd. (hereinafter referred to as Haohai Vision) is the eye health business segment of Shanghai Haohai Biological Technology Co., Ltd. ,the first biopharmaceutical company in China listed on both the SSE STAR Market and the Hong Kong Stock Exchange. Founded in 2007, Haohai Vision has 18 years of expertise across the full industry chain, from raw materials to R&D, production,and sales. Today, we rank as a globally leading producer of intraocular lenses (IOLs), holding a prominent market share in China with annual sales exceeding 1 million units. In addition, our ophthalmic viscosurgical device (OVD) has maintained the No. 1 position in the Chinese market for 18 consecutive years. With a global perspective, we advance intelligent manufacturing in China. Supported by 7 R&D bases across 3 continents, we are committed to the efficient translation and localization of advanced technologies, enabling us to provide comprehensive eye health solutions

上海昊海医药科技发展有限公司（以下简称“昊海眼科“）是上海昊海生物科技股份有限公司（国内首家“H+科创板”生物医药上市公司）旗下专注于眼健康的业务板块。 自2007年成立以来，深耕行业18载，实现从原材料、研发、生产到销售的全产业链布局。目前，昊海眼科是全球领先的人工晶状体生产商之一，在中国市场年销量超过100万片，占领军地位；其眼科粘弹剂已连续18年蝉联中国市场份额第一。 昊海眼科以全球视野践行中国智造，在全球三大洲设有7个研发基地，致力于技术高效转化与国产化进程，为全球患者提供覆盖眼健康全生命周期的综合解决方案。 昊海眼科引领眼健康全新未来，创见非凡视界无尽可能。

accessible to patients worldwide throughout the full life cycle. Haohai Vision is shaping a new future of eye health, unlocking infinite possibilities for an extraordinary visual world.

01 FVR IOL 全视佳®五级光效全视程人工晶状体+I3:L7

Specification 规格： MEA60

1. Patented Fourier Harmonic Diffractive Technology Achieves nearly 100% light energy utilization at a 3.5 mm pupil diameter. 2. Five-Focus Full-Range Vision Design Provides high-quality vision across the full visual range, from distance to near. 3. P.U.R.E. Impurity Removal Technology Helps reduce postoperative inflammatory response by removing impurities. 4. Nanometer-Scale CNC Manufacturing Process A polishing-free process that reduces energy loss and optical interference. 5. 360° Anti-PCO ring design Features a 360-degree continuous ridge structure to help prevent posterior capsule opacification.

1.傅里叶谐波专利衍射，3.5mm瞳孔下光能利用率近100%; 2.五焦点全视程设计，提供由远及近全视程高质量视力; 3.P.U.R.E杂质溶除技术，降低术后炎症反应; 4.纳米级数控加工工艺，免抛光，降低能量损失和光学干扰; 5.360°防后发障全环脊设计;

03 Trifocal IOL and Trifocal Toric IOL 享无界®三焦点及三焦点散光人工晶状体

Specification 规格： STF1，STF1-T0~T7

A complete solution for cataracts and astigmatism, suitable for a broader range of cataract patients with visual needs across all distances. The Weighted Phase Model (W.P.M.) design increases the utilization rate of light to 90%, ensuring a smooth defocus curve and high-definition vision across the full viewing range. V-Free precision filtering technology reduces visual disturbances. The long-term effect is stable and excellent, resulting in high patient satisfaction.

白内障+散光完整解决方案，适用更多需要全程视力的白内障患者；加权相位优化模型（W.P.M.）设计，提升光能利用率至90%，焦曲线平滑，全程高清；V-free精准滤波，更少视觉干扰；长期效果稳定，患者满意度高。

05 Eyesucom® Lubricant eye drops 眼舒康®润眼液

Specification 规格： 10×0.4 ml；30×0.4 ml；15 ml

Featuring 0.4% chitosan and 0.05% sodium hyaluronate as its key ingredients, this formula works together to create a powerful synergistic effect. Long-lasting hydration: Positively charged chitosan bonds with negatively charged mucins on the ocular surface, while at the same time, forming complex structures with sodium hyaluronate to lock in moisture for lasting hydration. Dual repair effects: Compared to hyaluronic acid, chitosan has a stronger ability to promote corneal epithelial repair; the two ingredients work culmunatively to provide a dual repair effects. Natural antibacterial protection: The positively charged chitosan can bind to the negatively charged surfaces of bacteria, exerting a natural antibacterial effect. Available in single-dose and preservative-free multi dose formulations.

0.4%几丁糖和0.05%透明质酸钠为主要成分，强强联合，协同作用。 持久润眼：带正电荷的几丁糖锚定负电荷眼表粘蛋白，同时与透明质酸钠形成缠绕结构，锁住水分，持久润眼。 双重修复：几丁糖具有更强的促进角膜上皮修复能力，两种成分，双重修复。 天然抑菌：带正电荷的几丁糖能够与细菌表面负电荷结合，起到抑菌作用。 有单剂量包装和无防腐剂多剂量包装两种规格

01 Integrated Coaxial Coplanar CT- Linac Fusion X 一体化同轴共面 CT 直线加速器Fusion X

Specification 规格： Dimensions: 4749×2900×2575mm Weight：8.5t

Fusion X is an integrated coaxial coplanar CT- Linac independently developed by Zhiwei Precision. It represents an architectural milestone in the field of linear accelerators. Equipped with a 100 cm large-bore 64-slice CT imaging system, the device achieves physical coaxial and coplanar integration with the therapeutic linear accelerator, forming a native hardware and software system of "CT-Linac". It has formally pioneered the brand-new technical track of coaxial coplanar CT linear accelerators, setting a new-generation technical benchmark for precision radiotherapy worldwide.

Fusion X 为智维精准自主研发的一体化同轴共面 CT 直线加速器，属于直线加速器领域架构级里程碑产品。设备搭载100 cm 大孔径 64 排 CT 成像系统，与直线治疗加速器完成物理空间上的同轴共面一体化融合，完整构建 “CTLinac” 原生软硬件系统。 正式开辟同轴共面CT直线加速器这一全新技术赛道，为全球精准放疗树立新一代技术参照。

we boast advanced R&D laboratories, a professional scientific research team, and state-of-the-art equipment. We are dedicated to core biopharmaceutical technologies, upholding rigorous standards and driving innovation. Key advantages: Controlled microbiological testing environment: Sterile, dust-free, and temperature- and humidity-regulated laboratories ensure accuracy. Fully automated production: Integrated liquid preparation systems (concentration/dilution mixing, cleaning, sterilization) minimize human intervention and contamination. Quality-focused manufacturing: Clean production areas and BSL-2 certified microbiological preparation laboratories guarantee stable and safe outputs. Certifications and IP portfolio: Over 30 patents (including 4 inventions), fully compliant with regulatory requirements. We prioritize customer needs, delivering exceptional service and reliable solutions. Let us move forward together.

位于上海奥来雅康医疗科技有限公司，我们拥有先进的研发实验室、专业的科研团队以及尖端设备。我们致力于核心生物医药技术，秉持严谨标准，推动创新。 主要优势： 受控的微生物检测环境：无菌、无尘且温湿度可控的实验室确保检测结果的准确性。全自动生产：集成式液体配制系统（包括浓度/稀释混合、清洗和灭菌）最大限度地减少了人工干预和污染风险。 以质量为核心的制造：洁净生产区与通过 BSL-2 认证的微生物制备实验室，确保产出稳定且安全。 认证与知识产权组合：拥有 30 多项专利（其中包括 4 项发明），完全符合监管要求。 我们优先考虑客户需求，提供卓越的服务和可靠的解决方案。让我们携手共进。

02 Grounding Pads 中性电极

Specification 规格： GP202D-A, GP202S-A, GP202D-AC, GP202S-AC

It is commonly known as patient plate, grounding pad or return electrode. Its large and wide surface area promotes low current density, which in turn can be safely directed out of the patient's body during an electro-surgical procedure to prevent burn. These pads offer extra patient safety by signaling the system to shut down if the patient is not in complete contact with the pad.Conductive surface made of aluminium sheet, low in resistance, negative of cytoxicity skin, sensitization and acute coetaneous irritation.

中性电极又称负电极、阴极板、返回电极、分散电极，它利用宽大的表面来降低电流密度，在电外科手术中安全的导引病人身体上的电流，并且防止灼伤。此种中性电极可以在自身没有完全跟病人贴合的情况下使主机报警以提高安全保障。导电表面是由铝箔制成的，电阻低。产品通过生物相容性测试。

04 ECG Electrodes 一次性使用心电电极

Specification 规格： CH55RD, CH4349TD, CH2222FD

It is applicable to the clinical electrocardiography inspect and dynamic & static electrocardiography monitoring of patients suffering from heart disease in the hospital. It uses Ag/AgCl as sensing element and hydro-gel as adhesive element. Those elements are very suitable for improving their sensitivities. Hydro-gel has an advantage of minimizing the movement artifact by increasing the adhesive force between the skin and the sensing element.

一次性使用心电电极主要应用于临床心电检查以及动静态心电监护仪器，同时也用于多种监护仪器。产品使用Ag/AgCl做为感应元件，水凝胶做为粘性元件。材料具有很好的皮肤适应性。水凝胶用来加强产品与皮肤的粘贴效果从而降低因为病人活动造成接触不良。

01 Intesafe™ Needle Protector for Prefill Syringe 一体化安全型预灌封注射器

Specification 规格： NA

Use the COC barrel with integrated rigid needle cover for needlestick protection, load drugs with existing filling and packaging lines, and enjoy safe, stable, and easy injection with lightweight, breakage-resistant material.

节省成本,便于储运。握感舒适,便于操作。不惧碎裂,提高药物相容性。

CERTIFICATIONS 认证

ISO13485、ISO9001

02 Inpacpen RCP® Reusable Adjustable Dose Cartridge Injection Pen 重复性可调剂量卡式瓶注射笔

Specification 规格： NA

Install a 3mL standard cartridge and pen needle, adjust 0–60 units via high-contrast display, enjoy easy cartridge replacement and last dose reminder, and reuse by replacing the cartridge.

多药适配、人因友好、聚焦长期用药。高对比度剂量显示，视力欠佳患者也易使用。最后剂量提醒，人机交互功能，提高用药安全性。

CERTIFICATIONS 认证

CE、ISO13485、ISO9001

03 SAFETIS® Needle Protector for Prefill Syringe 针头保护器

Specification 规格： NA

Assemble the protector with a 1mL standard or long prefilled syringe and compatible needle; activate it with one hand after injection to automatically shield the needle, then dispose directly into a sharps container without clipping.

激发后自动覆盖针头，无需剪断针头，直接丢入锐器盒。单手即可完成激发动作。加宽卷边手持区域，提升注射稳定性。

CERTIFICATIONS 认证

ISO13485、ISO9001

04 InpacJector® Luer-lock Prefillable Syringe Barrels 鲁尔预灌封注射器

Specification 规格： NA

Choose the proper volume model, fill the drug using standard filling systems, connect with the integrated Luer-lock adapter to prevent needle separation, and perform precise injection with smooth sliding and breakage-resistant performance.

安全可靠，不含钨、不析碱、无玻璃碎屑，抗碎裂。成形精度高，死体积小。已通过美国FDA许可，已被客户申报FDA并获批准的其药品配套应用。

CERTIFICATIONS 认证

ISO13485、ISO9001

05 Inpacpen MONO®Mono Dose Cartridge Injection Pen 定量卡式瓶注射笔

Specification 规格： NA

Preset the fixed 0.08mL dose with visual and audible reminders, inject directly without priming for accurate and uniform delivery, then discard the pen safely after single use.

预设剂量0.08ml，每次固定剂量注射，伴声音、视觉提醒，降低使用错误风险。

CERTIFICATIONS 认证

ISO13485、ISO9001

06 Inpacpen DCP®Disposable Adjustable Dose Injection Pen Cartridge 一次性可调剂量卡式瓶注射笔

Specification 规格： NA

Dial the required dose with bidirectional adjustment and clear audible feedback, complete the injection smoothly, and discard the pen after one-time use for safe and precise dosing.

通过双向调节和清晰的听觉反馈拨选所需剂量，顺利完成注射，单次使用后将注射笔丢弃，以确保安全精确的给药。

CERTIFICATIONS 认证

ISO13485、ISO9001

07 Inpacpen DSP®Disposable Pre-fillable Injection Pen Syringe 一次性预灌封注射器注射笔

Specification 规格： NA

Remove the cap, press firmly to the injection site for automatic needle insertion upon a prompt tone, hold until the yellow indicator stops to finish injection, then discard the pen immediately.

两步轻松注射，内置自动进针机制，全程隐藏针头，提高注射舒适度进而提高患者依从性。

CERTIFICATIONS 认证

ISO13485、ISO9001

08 Inpacpen ESP®Disposable Adjustable Dose Cartridge Injection Pen (Energy Store) 一次性可调剂量卡式瓶注射笔（储能型）

Specification 规格： NA

Set the 0–80 unit dose via the touch-activated knob, use low-force energy-storage drive for comfortable injection with dose memory, and dispose after single use with broad drug compatibility.

0-80单位可调，适配市场上绝大多数卡式瓶注射制剂。剂量设定结构不外伸，提升握持和注射的舒适度。

CERTIFICATIONS 认证

ISO13485、ISO9001

09 VisioJet®Preloaded System For Hydrophilic Intraocular Lens（IOL）人工晶体推注器

Specification 规格： NA

Assemble the plunger rod, backstop and kinetic energy bin, load the hydrophilic IOL, and deliver the lens smoothly with stable kinetic energy for accurate and safe intraocular lens implantation.

利用稳定的动能平稳推送晶状体，以实现准确安全的人工晶状体植入。

CERTIFICATIONS 认证

ISO13485、ISO9001

10 Inpaclink® Sterile Vial Adapter 无菌药物转移器

Specification 规格： NA

Fix the adapter to an 11mm or 13mm vial neck, puncture the septum without an injection needle for safe drug transfer, and withdraw reconstituted solution easily to minimize drug residue and improve dosing accuracy.

无针转移，规避针刺伤风险。减少药液残留，注射剂量更精准。

Not for pregnant women or children.

天然植萃配方，专为学生党、上班族、熬夜党、驾车人群打造，可快速清醒提神、调整状态。可搭配扩香木、扩香石、香薰机使用。内含天然樟脑，孕妇与儿童禁用。

12 Xinglin AromaMed Mint Borneol Refreshing Massage Oil 杏林香约・薄荷龙脑清新按摩油

Natural botanical formula specially developed for students, office workers, night owls and drivers. It delivers quick refreshment to boost alertness and restore energy.Take an appropriate amount and apply to the nape of your neck and temples.Contains natural camphor. Not for pregnant women or children.

天然植萃配方，专为学生党、上班族、熬夜党、驾车人群打造，可快速清醒提神、调整状态。取适量涂于后颈与太阳穴即可。内含天然樟脑，孕妇与儿童禁用。

13 Brightening Spot-Fading Facial Oil 靓颜倍润精华油

Formulated with a National Invention Patent. Blended with precious botanical extracts, clinically tested to improve multiple skin concerns within 14 days. Over 89% of users saw improvement in hyperpigmentation and dullness, while acne marks and scars improved by over 85%. Lightweight, non-greasy texture, suitable for dull, blemished, and dry skin. With continued use, it helps even skin tone, fade imperfections, and reveal a radiant, glass-skin glow from within.

国家发明专利配方，以珍贵植萃复配，14 天实测改善多种肌肤问题：针对黑色素沉着、肤色暗黄，超89%人群获得改善；痘印痘坑改善率超 85%。涂抹不黏腻，适配暗沉、痘印、干燥肌，坚持使用可匀净肤色、淡化瑕疵，由内焕现透亮水光肌。

14 Nourishing Firming Facial Oil 滋养紧致精华油

Formulated with a National Invention Patent. Clinically tested to deliver powerful anti-aging and repairing benefits within 14 days. Over 92% of users saw improvement in fine lines, wrinkles, skin laxity, and dehydration; dull, rough skin is also effectively revitalized. Crafted with natural botanical extracts, this lightweight, non-greasy formula is ideal for mature, dry, and early-aging skin. With continued use, it helps firm contours, brighten complexion, and reveal a plump, radiant glow from within.

国家发明专利配方，14 天实测抗老修护力拉满：针对干纹细纹、皮肤松弛、干燥缺水，超 92%人群获得改善；粗糙 / 暗沉肌也能有效焕活。以天然植萃为核心，质地清润不黏腻，适配轻熟龄、干皮及初老肌，坚持使用可紧致轮廓、匀亮肤色，由内焕现弹润透亮。

15 Breast Care Massage Oil 乳腺护理精油

Formulated with a National Invention Patent, specially designed for breast care. Clinical data shows that 96.43% of users experienced significant improvement in breast tenderness,100% saw notable relief from breast lumps, and 90% of those with breast hyperplasia reported good improvement. Made with gentle botanical extracts, it absorbs quickly with massage application, helping to soothe discomfort and support breast wellness.

国家发明专利配方，专为乳腺养护设计：实测数据显示，96.43%人群乳房胀痛改善良好，100%人群乳房肿块问题得到良好缓解，乳腺增生人群中也有90%获得良好改善。温和植萃配方，涂抹按摩即可吸收，助力舒缓不适、呵护乳腺健康。

16 Thyroid Support Massage Oil 甲状腺护理精油

Formulated with natural botanical extracts, specially designed for thyroid health. Clinical results over 90 days are impressive: after 1 month of use, 100% of users showed improvement (20% effective + 80% manageable); the effective rate increased to 58% at 2 months, and reached 96% at 3 months, with zero non-responsive cases. Apply and massage morning and evening for gentle absorption, supporting thyroid health and helping alleviate discomfort.

天然植萃配方，专为甲状腺养护设计：90 天实测数据亮眼，使用 1 个月即可实现 100% 改善（有效 20%+ 可控 80%），2 个月有效率提升至 58%，3 个月有效率高达96%，无无效案例。每日早晚涂抹按摩吸收，温和呵护甲状腺健康，助力调节不适状态。

17 Uterine Warming Massage Oil 暖宫精油

Formulated with a National Invention Patent, specially developed for those with primary dysmenorrhea. Clinical data over 14 days shows that the proportion of individuals with moderate to severe menstrual pain (scoring 6–8) dropped significantly from 65.63% to 15.62%, with pain levels notably reduced. Apply and massage onto the lower abdomen 1–2 times daily, starting 1–2 weeks before menstruation. Gently warms the uterus, dispels cold, and soothes menstrual discomfort. Discontinue use during menstruation.

国家发明专利配方，专为原发性痛经人群研发。14 天实测数据显示，中重度痛经（6-8 分）人群占比从65.63%显著降至15.62%，疼痛等级明显降低。每日 1-2 次，经前 1-2 周开始涂抹按摩小腹，温和暖宫驱寒、舒缓经期不适，经期需暂停使用。

18 Rose Radiance Essence 3.0 Facial Oil 玫瑰焕颜精粹3.0

Luxuriously nurtured with rose, this essence helps create a youthful complexion that is soft on the outside and resilient within. It leaves the skin hydrated, supple, and elastic, with a lightweight, fast-absorbing texture and a delicate, elegant rose fragrance.Key Ingredients: Otto rose essential oil, rose absolute.How to Use: After cleansing, mist with floral water. Warm an appropriate amount of the essence in your palms, then apply evenly to the face. During autumn and winter when skin feels dry, follow up with a facial cream for enhanced hydration.

玫瑰奢养，养出外柔内韧年轻肌，肌肤润泽有弹性，质地轻薄好吸收，自带清雅玫瑰清香。主要成分：奥图玫瑰精油、玫瑰净油。使用方法：洁面后喷涂纯露，取适量精粹于掌心搓热，均匀涂抹于面部；秋冬季肌肤干燥，可叠加面霜使用。

19 Jasmine Calming Essential Oil Blend 茉莉安神

Expertly blended with jasmine absolute, ginger absolute, bergamot essential oil, bitter orange leaf essential oil, and red mandarin essential oil. Formulated to relieve anxiety and enhance a sense of emotional stability. Combining the gentle floral notes of jasmine sambac with the fresh aromas of citrus and cedar, this soothing and well-loved fragrance offers a soft, comforting scent profile. Simply diffuse or inhale daily to calm the mind and create a peaceful, relaxing emotional experience.

以茉莉净油、姜净油、佛手柑精油、苦橙叶精油、红柑橘精油精心调配，主打缓解焦虑、提升心理安定感。融合小花茉莉的温润花香与柑橘、雪松的清新气息，香气层次柔和舒适，广受好评，日常扩香或嗅吸即可舒缓心绪，带来安稳放松的情绪体验。

20 Weizi North African Cedar Botanical Nourishing Shampoo 蔚姿北非雪松植物精粹养发洗发水

Infused with carefully selected herbal extracts and more than ten kinds of natural essential oils, it nourishes both scalp and hair strands at the same time.This formula has passed full national standard safety tests. Mild and moisturizing, it creates rich foam that rinses away easily. No separate conditioner required — cleansing, care and nourishment are all achieved in one bottle.It carries a subtle natural herbal scent. Practical tests show it softens and repairs dry damaged hair while balancing scalp condition.

精选草本提取物搭配十余种天然植物精油，同步滋养头皮与发丝；经国标全套安全检测，配方温和保湿，泡沫绵密易冲洗，无需额外搭配护发素，洗护养护一瓶到位，自带淡雅天然草木香，实测可柔顺修护干枯发质、平衡头皮状态。

Shanghai Hongtian Hongfu Biotechnology Co., Ltd.

上海洪天洪福生物科技有限公司

Health Supplements 保健品 | Employees 员工：13

Founded in 2021, Shanghai Hongtian Hongfu Biotechnology Co., Ltd. cooperates with Shanghai Institute of Geriatric Traditional Chinese Medicine. Supported by national TCM masters and nutrition experts, we developed the medicinal and edible health product series "Shanye Jiuxuangu".The company owns trademarks including "Shoutianyang". We strictly select raw materials such as wild ginseng from Jilin and authentic Chinese medicinal herbs from Bozhou, and produce products with qualified GMP-compliant manufacturers. All products have passed authoritative safety and nutritional tests. Rooted in the integrated medical-elderly care sector, we have won numerous honors including the Asia Famous Brand Award and the Panama Pacific International Exposition Award. We focus on developing tonic food for middle-aged and elderly people to consolidate vitality and nourish health.

上海洪天洪福生物科技2021年成立，携手上海市中医老年医学研究所，依托国医大师、营养专家团队研发“山野九玄谷”药食同源养生产品。公司持有“寿天养”等商标，严选吉林野山参、亳州道地药材，联合合规GMP工厂生产，产品通过权威机构安全与营养检测。深耕医养结合赛道，斩获亚洲名优品牌、巴拿马博览会奖项等多项荣誉，专注研发中老年固本培元食补产品。

LOOKING FOR AT THE FAIR 参展需求

We participate in the exhibition with Shanye Jiuxuangu health products to display our medicinal-food homologous R&D achievements and GMP production capacity. Relying on medical-elderly care integration, we showcase senior nourishment solutions, connect with enterprises and pension institutions, exchange industry experience, expand sales channels, and seek industry partners for joint development.

PRODUCTS 产品 (4)

01 Alcover Solid Beverage 醺尔舒固体饮料

Genetic factors render a majority of the Asian population prone to inadequate alcohol metabolism. We harness dihydromyricetin, which enhances the activity of alcohol dehydrogenase and aldehyde dehydrogenase to accelerate ethanol metabolism and excretion, thereby reducing alcohol's depressive effects on the central nervous system and alleviating post-drinking discomfort. It also curbs the production of reactive oxygen species and protects the liver. Meanwhile, the synergistic action of multiple natural botanicals ensures a more comfortable next-day recovery after drinking.

基因导致多数亚洲人种具有酒精代谢能力不足的问题。我们利用二氢杨梅素可以通过提高乙醇脱氢酶和乙醛脱氢酶的活性来促进乙醇代谢排出，降低酒精对中枢神经系统的抑制作用，从而缓解酒后不适；同时能降低活性氧的产生，保护肝脏；同时多种天然草本共同作用让醉酒的第二天醒来更舒适。

02 UricCare Botanical Powder Drink 诗风柠固体饮料

Currently available uric acid-lowering drugs commonly present numerous side effects, requiring patients to maintain long-term dietary restrictions that compromise their quality of life, while prolonged medication use may cause chronic damage to the body. Our approach gently reduces uric acid by enhancing its solubility – through urine alkalinization, we increase uric acid solubility, dissolve existing uric acid stones, and prevent the formation of new stones. In addition, we incorporate other effective botanical ingredients such as celery seed powder, amla (Indian gooseberry) powder, and corn silk powder, which help inhibit the conversion of purines into uric acid, alkalize urine, and simultaneously prevent inflammatory responses.

市面现有的降尿酸药物普遍存在较多副作用，患者需长期控制饮食降低生活质量，且长期摄入药物易对身体产生慢性损伤。我们利用增加尿酸的溶解性来温和降尿酸，通过碱化尿液制剂，从而增加尿酸的溶解度，溶解尿酸结石，防止新结石的形成。同时添加芹菜籽粉、余甘子粉、玉米须粉等其他有效成分，可有效抑制嘌呤转化为尿酸，碱化尿液的同时预防炎症反应。

03 Wellness Herbal Tea Bag 混合代用茶茶包

Rooted in the TCM philosophy of "food as medicine," infusing the essence of botanicals into your daily cup.

传承“药食同源”养生哲学，将草木精华融入日常一杯茶。多种植物科学配伍，口感清润回甘，适合日常饮用，由内而外调养身心。

04 Herbal Food Substitute Powder 药食同源代餐粉

Crafted from a carefully selected blend of natural botanical ingredients rooted in the “food-as-medicine” tradition, this herbal food substitute powderis formulated with modern nutritional science. Individually packed and easy to prepare – just add water and stir – it is ideal for breakfast, post-workout replenishment, or as a light meal substitute. With regular consumption, it helps support digestive health and metabolic balance, bringing the power of natural botanicals into your daily diet for lasting vitality from within.

精选多种药食同源天然植物原料，融合现代营养科学精制而成代餐粉。独立包装，即冲即饮，适合作为早餐、运动后补给或轻食替代。长期饮用有助于调理肠胃、平衡代谢，让天然植物力量融入每日膳食，由内而外焕发健康活力。

Renhetang was established in 1874 during the Tongzhi reign of the Qing Dynasty. In 1995, it was designated as a "China Time-Honored Brand" — one of the first enterprises to receive this honor — by the then Ministry of Internal Trade. In 2014, it was officially designated as a "Shanghai Time-Honored Brand" by the Shanghai Municipal Commission of Commerce. On February 1, 2024, it was included in the third official list of "China Time-Honored Brands," jointly announced by the Ministry of Commerce and four other national authorities. The company specializes in ginseng and deer antler products, health supplements, medical devices, cosmetics, and daily consumer goods.

“人和堂”始创于清同治十三年（1874年），于1995年首次被国内贸易部认定为“中华老字号”，2014年被上海市商务委员会认定为“上海老字号”， 2024年2月1日经国家商务部等5部门认定为第三批“中华老字号”。 上海人和堂健康科技有限公司主要经营参茸产品、保健食品、医疗器械、化妆品、日用百货等。

PRODUCTS 产品 (5)

01 Broken-cell-wall Ganoderma Lucidum Spore Powder 破壁灵芝孢子粉

Specification 规格： 1克/袋*100袋

This product delivers targeted benefits for various populations. For individuals with weakened immunity, it enhances the activity of immune cells and reduces the incidence of colds and infections. For those experiencing high stress or sub-health conditions, the triterpenoids and polysaccharides in this product help regulate the nervous system, relieve fatigue, and improve sleep quality. With strong antioxidant properties, it helps eliminate free radicals, slow down cellular aging, and support overall vitality. It also plays a supportive role in maintaining cardiovascular and cerebrovascular health and improving chronic conditions.

针对不同人群精准赋能：免疫力低下者食用可激活免疫细胞活性，减少感冒、感染等疾病发生；工作压力大、亚健康人群可借助其含有的三萜类化合物与多糖，调节神经系统、缓解疲劳、改善睡眠；同时具备抗氧化功效，能清除体内自由基、延缓细胞衰老，对心脑血管健康及慢性疾病改善起到辅助作用。

Q/YSZY0007S

02 Freeze-Dried American Ginseng Slices 西洋参冻干片

Specification 规格： 12克(0.6/片*20片)

Made from fresh American ginseng processed under continuous low-temperature cold-chain control, this product retains not only the key active compounds but also natural enzymes, enhancing bioavailability. It supports cardiovascular health, helps prevent arrhythmia, and regulates blood pressure, aiding recovery from heart and cerebrovascular issues. It strengthens central nervous system function, calms the mind, alleviates restlessness, and improves symptoms of insomnia and memory loss. Additionally, it boosts immunity, promotes protein synthesis, and increases the body's resistance to illness. It assists in managing diabetes by improving glucose and lipid metabolism. Tonifying the lungs, clearing internal heat, nourishing the stomach, and promoting fluid production, it relieves fatigue and irritability — meeting both wellness and therapeutic needs.

产品由新鲜的西洋参经过全程低温冷链控制加工得到，除了保留西洋参有效成分外，还保留了西洋参活性酶成分，更易被人体吸收，保护心血管系统，抗心律失常、调节血压，助力心脑血管疾病恢复；增强中枢神经功能，静心凝神、改善失眠与记忆力衰退；提升免疫力，促进蛋白合成，增强机体抗病能力；辅助调节糖尿病，改善糖脂代谢；补肺降火、养胃生津，缓解疲劳与烦躁，兼顾养生与调理双重需求。

04 Wild Ginseng Powder 野山参粉

Specification 规格： 2克/盒

Crafted from wild ginseng harvested from the Changbai Mountains after naturally growing for over 15 years, this powder is processed via sun-drying, ultra-fine grinding, or low-temperature cell disruption techniques. These processes fully preserve bioactive components including ginsenosides, amino acids, and vitamins. Its principal benefits include effectively replenishing vital energy (qi), balancing qi and blood, calming the spirit, enhancing cognitive function, generating body fluids, and relieving dryness. This product represents a revered traditional remedy in a modern, convenient format.

野山参粉以15年以上长白山野生山参为基础，经生晒、超微粉碎或低温破壁工艺加工而成，完整保留人参皂甙、氨基酸、维生素等活性物质。其核心功效为大补元气、调和气血、安神益智、生津止渴，是传统养生佳品的现代便捷呈现。

爱优诺医养（上海）健康管理有限公司

Health Supplements 保健品 | Specialised & Innovative Enterprise · 专精特新企业 | Employees 员工：600 | aiyounuo.net

AusNuotore Medical Care (Shanghai) Health Management Co., Ltd. is a core FSMP enterprise of Zhongte Life & Health Technology Group, a nationally recognized Specialized, Refined, Distinctive and Innovative (SRDI) enterprise, and one of China's leading FSMP suppliers by sales. The company holds 24 China State FSMP registrations (TY series), among the highest in the domestic industry, spanning infant formulas (0–12 months), pediatric complete nutrition (ages 1–10), and adult complete, peptide-based and modular formulas (ages 10+). Its products are sold nationwide in China through hospital, pharmacy and e-commerce channels, and expanding into Southeast Asia, Central Asia, the Middle East and other Belt & Road markets. Backed by the group's GMP-certified manufacturing, key raw materials come from world-class partners including Fonterra (New Zealand) and DSM. All products comply with GB 29922-2025 and are developed with reference to ESPEN and ERAS guidelines, offering partners clinically grounded products, reliable supply and full regulatory support.

爱优诺医养（上海）健康管理有限公司是中特生命健康科技集团旗下企业、国家级专精特新企业，特医食品国内销量领先。公司已获批24款国食注字注册批文，数量居行业前列，覆盖婴儿、儿童及成人全营养、短肽与组件配方。集团建有GMP标准工厂，核心原料由恒天然、DSM等全球知名供应商提供，产品畅销全国并远销海外。

LOOKING FOR AT THE FAIR 参展需求

Our participation aims to explore the Southeast Asian market and to identify distribution partners with strong regional and channel coverage capabilities. We are seeking importers, distributors and channel operators with established networks across hospital/clinical nutrition, pharmacy, maternal-and-infant retail and e-commerce channels, to introduce our registered FSMP portfolio (24 China State registrations, one of the most comprehensive in the industry) into regional markets.

PARTNERSHIP MODEL 合作模式

We are open to flexible cooperation models: ① country-level or regional exclusive / non-exclusive distribution (agency) partnerships for our registered FSMP products; ② OEM / private-label manufacturing for our other nutrition product lines. Please note: under Chinese regulations, Foods for Special Medical Purposes (FSMP) and infant formula are not available for OEM cooperation; all other nutrition products are open to OEM and private-label arrangements.

08 AusNuotore Youkanglitai Nutritionally Complete Formula (Peptide-based) for Special Medical Purposes 爱优诺优康力太特殊医学用途全营养配方食品（短肽型，10岁以上）

Specification 规格： Powder | 400 g/tin × 12 tins/carton

China State FSMP Reg. No. TY20230028. Technology highlight: high-purity extensively hydrolyzed whey protein with a peptide content of 98.1%, rapidly absorbed with minimal digestion; whey sourced from Fonterra (New Zealand). Low fat (7 g/100 g, approx. 50% MCT) to ease digestive load; lactose-free (below 0.5 g/100 g); with soluble prebiotic FOS; osmolality 370 mOsmol/kg; oral or tube feeding. The first-line choice for patients with maldigestion or malabsorption — peptide-based formulas are guideline-preferred in active IBD, short bowel syndrome and early postoperative feeding. To be used under medical supervision.

国食注字TY20230028。科技亮点：高纯度深度水解乳清蛋白，肽含量达98.1%，无需充分消化即可快速吸收；乳清原料由新西兰恒天然供应。低脂肪7g/100g（MCT约占50%），消化负担小；无乳糖（<0.5g/100g），乳糖不耐受人群适用；添加水溶性益生元FOS；渗透压370mOsmol/kg；口服管饲均可。消化吸收障碍患者营养支持首选，IBD、短肠综合征、术后早期等场景指南推荐短肽配方。

01 Standard Care Mattress 普通护理床垫

The standard care mattress is a basic care support product designed for use on standard nursing beds or home care beds. Featuring an integrated mattress structure, it provides balanced support and comfort to meet the basic needs of daily lying and rest in care settings.

普通护理床垫为基础型护理支撑产 品，适用于标准护理床或居家护理 床使用。床垫采用整体式结构，提 供均匀支撑与舒适承托，满足日常 卧床护理的基本需求。

02 Segmented Care Mattress 分段式护理床垫

The segmented care mattress is specifically designed for nursing beds. Through its segmented surface structure, the mattress maintains good conformity during back-lift and leg-lift adjustments of the nursing bed, enhancing lying comfort and facilitating smoother care operations.

分段式护理床垫为护理床专用设计 ，通过床垫表面的分段结构，使床垫在护理床抬背、抬腿等调节过程 中保持良好的贴合度，提升卧床舒 适性与护理操作的顺畅性.

03 Care Mattress with Hygiene Cutout 开孔式护理床垫

Based on the segmented structure, the care mattress with hygiene cutout incorpordtes an auxilliary cutout design in the pelvic area This design allows for convenient use in conjunction with nursing beds or toileting accessories, reducing the need for frequent patient repositioning and lowering caregiver workload. while improving overall care efficiency and safety.

开孔式护理床垫在分段结构基础上 增加骨盆区域辅助护理开孔设计 便于配合护理床或便盆使用，旨 在降低护理操作强度，提高卧床护理的便利性与安全性，

04 Standard Support Pillow 面包枕

The standard support pillow features a unified structural design, offering consistent support perfomance across different size options. Its stable shape and evenly distributed support make it suitable for a variety of bedside care scenarios. The pillow provides reliable positioning assistance while remaining adaptable to different lying postures and care needs.

面包枕采用统一的结构设计，通过不同尺寸规格提供相同 的支撑性能。枕头外形稳定、支撑均匀，适用于多种卧床 护理场景，同时兼具可趴、可靠的功能适用与不同体位的 护理需求。

05 Dual-Height Cervical Support Pillow 高低枕

The dual-height cervical $lupport pillow is designed with two different heightlevels on each side, providing flexible options for users with varying neck support requirements. Caregivers or users can select the appropriate height based on body position and comfort needs, helping maintain stable and natural cervical alignment.

高低护理枕通过两端不同高度设计，为头颈支撑需求存在差 异的护理对象提供选择空间。使用者或护理人员可根据体位 与舒适度及护理要求，选择合适的支撑高度，以获得更稳定 和自然的头颈承托。

06 Prone Position Support Pillow 趴睡枕

The prone position support pillow is specifically designed for face-down positioning. It provides support space for the face and upper body, reducing pressure during prolonged prone positioning. The structure helps maintain a stable and comfortable posture during postoperative care or therapeutic procedures.

趴睡枕专为俯卧体位设计，为面部及上身提供支撑空间，减 少俯卧状态下的压迫感。枕头结构有助于在俯卧位护理或康 复操作中，保持相对舒适和稳定的体位状态。

07 Cutout Care Cushion 开孔护理坐垫

The pressure-relief care cushion adopts a memory foam structure with high conformity and resillience. In seated positions, it provides targeted support while avoiding direct pressure on sensitive areas through its cutout design.By adapting to body contours, the cushion helps distribute sitting pressure and reduce localized stress, contributing to pressure injury prevention. The structure also facilitates toileting and excretion assistance, making it suitable fo postoperative and long-term care use while improving overall care convenience and comfort.

护理坐垫=采用具备良好回弹性与贴合性的记忆棉结构，在 坐姿状态下为臀部与骨盆区域提供稳定支撑。通过对人体 曲线的自适应贴合，分散坐姿时的受力集中，减少局部持 续受压，有助于降低压疮发生风险。同时，坐垫结构设计 便于如厕与排泄操作，适用于术后及长期护理场景，提升 护理便利性与使用舒适度。

08 Standard Care Cushion 普通护理坐垫

The standard care cushion features a memory foam structure with good conformity and stable support performance.In seated positions, it provides balanced support for the hips and surrounding areas by adapting naturally to body contours. Pressure is evenly distributed to reduce localized compression during prolonged sitting. helping improve comfort in daily use and care scenarios.

普通护理坐垫采用具备良好回弹性与shion features a memory foam贴合性的记忆棉结构， 在坐姿状态下为臀部与骨盆区城提供稳定、均匀的支撑。通 过对人体曲线的自适应贴合，分散坐姿时的受力集中，减少 局部持续受压，有助于降低压疮发生风险，提升久坐护理与 日常使用的舒适性。

01 1、Bian-stone Massage Appliance 1、砭石刮痧器

Bian-stone Scraping ApplianceCrafted from natural Sibin red Bian-stone, it features intelligent three-level temperature control and high-frequency micro-vibration. The 12-point edged scraping head fits body curves comfortably and supports wireless operation. Combining traditional Bian-stone therapy with modern technology, it not only soothes muscle tension but also deeply unblocks meridians and promotes blood and qi circulation. Suitable for home therapy, professional care, and various wellness scenarios, it offers an efficient and flexible Bian-stone health experience.

采用天然泗滨红砭石精制而成。配备智能三档温控与高频微振，12凸点棱边刮头贴合人体曲线，支持无线操作。融合传统砭术与现代科技，不仅舒缓肌肉紧张，更能深入疏通经络、促进气血循环，适用于家庭理疗、专业养护等多场景，带来高效灵活的砭石养生体验。

02 2、Buttocks Warmer Appliance 2、温坐仪

Buttocks Warmer ApplianceDesigned for hip and pelvic area wellness, this ultra-thin cushion-style device provides moxibustion while seated. It offers smart temperature control without smoke or open flame. Precisely warms core points such as Baliao and perineum, while its concave-convex heat-concentrating structure allows deep penetration of moxa heat. Aims to warm the uterus, dispel cold-dampness, and improve qi-blood flow in the lower body. Suitable for relieving sedentary fatigue and daily pelvic care, it offers convenient and effective moxibustion for both home and professional use.

专为臀部与盆腔区域养生设计。采用超薄坐垫形态，坐下即灸，智能控温无烟无明火。精准温灸八髎、会阴等核心穴位，借助凹凸聚热结构使艾热深透，旨在温养胞宫、散寒除湿、疏通下焦气血。适用于久坐疲劳缓解、日常盆腔养护，为家庭与专业场景提供便捷有效的艾灸调理。

03 3、Bian-stone Abdominal Massager Appliance 3、砭石自动揉腹仪

Bian-stone Abdominal Massager ApplianceEquipped with a natural Sibin red Bian-stone massage head and constant temperature heating, it delivers a warm and penetrating abdominal kneading experience. The 14mm massage ball simulates hand-like kneading with moderate pressure, and direction and speed can be freely adjusted. An adjustable strap fits various waist sizes, freeing the hands for ease of use. Suitable for home, office, and other settings, it helps relax the abdomen, release tension, and makes daily abdominal massage easier to maintain.

采用天然泗滨红砭石揉腹头，配合恒温加热，带来温暖深透的揉腹体验。14mm按摩球仿人手揉按，力度适中，可自由调节方向与速度。绑带适配不同腰围，解放双手，适用于居家、办公等多种场景，帮助放松腹部、舒缓紧绷，让日常揉腹更轻松易坚持。

04 4、Double-head warmer appliance 4、双头温阳仪

Double-head Warmer ApplianceA full-body moxibustion device that blends traditional moxibustion principles with modern technology. It supports both single and double-head modes for flexible use, featuring intelligent temperature control to meet personalized needs. The specially designed moxa heads and energy skirt concentrate and deepen heat penetration, releasing gentle yet effective moxa warmth. Smokeless and flameless, it ensures safe and convenient operation. Suitable for home and wellness settings, it offers a soothing and efficient moxibustion experience anytime.

是一款融合传统艾灸理念与现代科技的全身艾灸设备，支持单头与双头自由切换，智能控温，满足个性艾灸需求。通过精准控温释放艾热，配合特有灸头与能量裙设计，热力集中、渗透深入。无烟无明火，操作安全便捷，适用于家庭与养生场所，随时享受温和有效的艾灸养护。

05 5、Foot warmer appliance 5、多功能温脚仪

Foot Warmer ApplianceAn intelligent moxibustion device designed specifically for foot acupuncture point care. Based on traditional Chinese foot health theory, it uses precise electric heating to release mugwort essence, simultaneously warming key areas including the soles, instep, and ankles. Smokeless and flameless with adjustable temperature, it is easy to operate and helps relieve foot discomfort while promoting blood and qi circulation. Ideal for home healthcare and wellness therapy, it delivers a focused and comfortable modern foot moxibustion experience.

是一款专为足部穴位养护设计的智能艾灸设备。基于中医足部养生理论，结合精准电加热技术，释放艾草成分，可同步温灸足底、脚背及脚踝等多处穴位。无烟无明火，温度可控，操作简便，帮助缓解足部不适，促进气血循环。适用于家庭保健与养生理疗，为您带来专注、舒适的现代足部艾灸体验。

01 CE Certification Services CE认证服务

Specification 规格： CE Certification Services

UDEM is a Notified Body designated under the (EU) Medical Device Regulation (MDR 2017/745). UDEM is also a member of the NBCG (Approval Body Coordination Group), which aims to monitor legislative practices and share information. In addition to conformity assessment services within the scope of the MDR, we also provide system certification services under ISO 13485.

UDEM 是(EU)《医疗器械法规》(Medical Device Regulation2017/745)指定的公告机构。同时，UDEM也是NBCG(批准组织协调小组)的成员，目的是跟踪立法实践和共享信息。除了在MDR的范围内的合格评定服务外，我们还提供ISO13485范围内的系统认证服务。

Matwings Technology — AI-Driven Full-Stack Protein R&D Platform. Powered by MatwingsVenus™, a proprietary lightweight AI bio-design platform, serving life science and biomanufacturing. Built on a four-pillar capability framework — Scientific Tools, Deep Research, Products, and Solutions — MatwingsVenus™ leverages AI agents to advance protein design and scientific collaboration. The platform delivers recombinant proteins, purification tools, and related products, alongside tailored solutions encompassing custom models and specialized AI agents. From exploratory R&D to commercial deployment, this integrated architecture addresses the diverse requirements of both research and industry users.

天鹜科技——AI驱动全栈式蛋白质研发平台，以自研的轻量级AI生物设计平台MatwingsVenus™（晓鹜™）为引擎，面向生命科学与生物制造场景。围绕“科学工具、深度调研、产品、解决方案”四大能力体系，晓鹜™以智能体赋能蛋白设计与科研协作，提供重组蛋白、纯化工具等蛋白质相关产品，并通过定制模型、定制智能体等解决方案，满足科研与产业用户从研发探索到成果落地的多元需求。

01 MatwingsVenus™: Lightweight AI Biological Design Platform MatwingsVenus™（晓鹜™）：轻量级AI生物设计平台

MatwingsVenus™ is a lightweight AI biological design platform independently developed by Matwings . It pioneers an intelligent R&D paradigm of "design-as-validation, validation-as-iteration." The platform has already delivered multiple benchmark application cases in core sectors such as innovative therapeutics and synthetic biology. It was also selected for the "Treasure of the Pavilion" honors at WAIC 2026 (World Artificial Intelligence Conference 2026), where it was the only AI4S (AI for Science) product named to that year's list. Its foundation model, VenusREM, has long held the top position on the ProteinGym benchmark from Harvard Medical School, and in Harvard University's latest preprint PG-LLM evaluation, it has become the authoritative reference benchmark for the protein mutation prediction industry. The platform deeply integrates a database of tens of billions of real protein annotation records, 500+ professional protein design tools, and 60+ Skills tuned by domain experts, and brings together 50+ certified experts. Through natural-language conversation, users can direct the agent to carry out a wide range of core protein R&D tasks—including deep research, database retrieval, and protein design (e.g., enzyme mining, directed evolution, and de novo design)—while also supporting one-click ordering of automated wet-lab services for rapid experimental validation of proposed designs. The platform's complementary expert consulting services further provide users with authoritative guidance and optimization recommendations.

MatwingsVenus™（晓鹜™）是天鹜科技自主研发的一款轻量级AI生物设计平台，创新性构建“设计即验证、验证即迭代”的智能化研发范式。目前，该平台已在创新药、合成生物学等核心领域落地多个标杆应用案例；并成功入选WAIC2026「镇馆之宝」，为该届唯一入选榜单的AI4S(科学智能)产品。其基座模型VenusREM在哈佛医学院的ProteinGym榜单上长期位居榜首，并在哈佛大学最新发布的预印本PG-LLM评测中，成为蛋白突变预测行业对标权威参照。 平台深度整合数百亿真实蛋白质标签数据库、500+专业蛋白质设计工具、60+领域专家调优的Skills，并汇聚50+认证专家资源。用户通过自然语言对话，即可调动智能体完成各类蛋白质核心研发工作，包括深度研究、数据库检索、蛋白质设计（如酶挖掘、定向进化、从头设计等），同时支持一键下单自动化湿实验服务，实现方案的快速落地验证。平台配套的专家咨询服务，也可为用户提供权威指导与优化建议。

02 Semaglutide Intermediate P29 司美格鲁肽中间体29肽

Specification 规格： kg；Custom specifications available

Semaglutide is a long-acting glucagon-like peptide-1 (GLP-1) receptor agonist, widely used in the management of type 2 diabetes and obesity. The 29-amino-acid backbone intermediate is a key raw material for semaglutide synthesis, directly influencing the quality of subsequent modifications, purification, and large-scale production. This intermediate can be produced via chemical synthesis or fermentation; the product described herein is manufactured via fermentation.

司美格鲁肽（Semaglutide）是一种长效GLP-1受体激动剂，广泛用于2型糖尿病及体重管理。其中间体29肽是合成司美格鲁肽的关键基础原料，直接影响后续修饰、纯化及规模化生产质量。中间体29肽的主要生产方式包括化学法和生物发酵法，本产品由生物发酵法制备。

03 Nexligos™ Protein A Alkali Nexligos™ Protein A Alkali 亲和层析填料

Specification 规格： Custom specifications available

Nexligos™ Protein A Alkali features an alkali-stabilized recombinant Protein A ligand engineered by the protein R&D AI agent MatwingsVenus™ , and is suitable for monoclonal antibody (mAb) purification. Under the alkaline conditions employed during clean-in-place (CIP) and sanitization, this ligand demonstrates superior stability compared to conventional Protein A affinity resins and withstands stringent CIP and sanitization procedures using 0.1 to 0.5 M NaOH.

Protein A 亲和层析填料利用 Protein A 配基与抗体 Fc 区域的特异性结合，实现目标抗体的快速捕获和纯化。通过Protein A配基蛋白的改造使其可耐受0.5~1.0 M NaOH，大大延长其适用寿命。

04 FYVE™ Lactulose Lime FYVE™ 乳果糖柠檬饮品

Specification 规格： 45mL×6

Traditional lactulose products on the market contain absorbable monosaccharides, making them unsafe for people with diabetes to use with confidence. Our proprietary product contains zero absorbable monosaccharides and carries no risk of raising blood glucose.

市面传统乳果糖含有可吸收单糖，糖尿病患者无法安心使用，自研产品零可吸收单糖，不存在升糖隐患

05 aiselotech Kombucha 爱赛洛康普茶

Specification 规格： 250 mL/bottle

Brewed using a traditional fermentation method with a Jinjunmei-grade Congou black tea base, this kombucha is made from 85% raw fermented tea with 15% carbonation. It captures the natural aroma of the original tea infusion and delivers a crisp, sparkling mouthfeel—genuinely fermented from real tea, not reconstituted.

采用传统发酵工艺，以类金骏眉茶叶（工夫红茶）为基底，经自然发酵制成。85%原茶发酵液搭配15%二氧化碳，保留原茶本味与发酵香气，气泡口感清爽顺喉。坚持真茶实酿，不做勾兑稀释，是一款原汁原味的气泡康普茶。
